

## **PRODUCT DATA SHEETS**

### **CRUISER – ALUMINUM & STAINLESS STEEL CLEANER**

#### **DESCRIPTION**

This product is a metal brightener designed to remove heavy oxidation, corrosion and diesel smoke from stainless steel and aluminum trailers and other surfaces. It will not damage paint, lettering or decals when used as directed.

It can be used on automobile wire spoke wheels and aluminum and magnesium wheel covers, as effective cleaner and re-conditioner to restore the “like new” sparkling brilliance.

It can be diluted from 1 part to 4 parts water, up to 1 to 10 parts water, depending on the condition of the surface and the air temperature. Warmer temperatures permit a higher dilution rate.

#### **FEATURES**

- **SAFE TO HANDLE**
- **REMOVES ROAD FILM**
- **REMOVES BRAKE DUST**
- **REMOVES HEAVY OXIDATION**

#### **USE AND DIRECTIONS**

**For Large Areas:** Spray or brush a 12 ft. wide area at a time. Allow mixture to contact surface for 2-5 minutes, keep surface wet. Rinse well, and avoid contact with glass surfaces.

**For Aluminum Wheels:** Clean one wheel at a time. Spray on, allow to sit 2 minutes and rinse off.

**CAUTION: NOT FOR HIGHLY POLISHED ALLOY WHEELS.**
