"We have been using Royal Purple products at our plant for over ten years now and have several pieces of equipment that has met or exceeded its life span operationally. Our reciprocating compressor life was extended by 50% and we have some positive displacement blowers that have over 100,000 hours on them and still running fine. For high heat and high RPM applications the Royal Purple Synfilm products have worked great for us."

L Nelson. Maintenance Superintendent.
