

METAL FABRICATION

RTR AUTOMATION. METAL FABRICATION

At RTR we pride ourselves on innovation and design when it comes to metal fabrication. Using Craftsmen of the highest caliber we provide nothing but the highest quality.

We produce unique products to our customers to meet all their needs, from one of a kind design to duplicating what they already have. Examples would be:

- Production line assembly tables.
- Shipping Carts.
- Production Carts.
- Machine structures.
- Tilt Tables

TYPES OF INDUSTRY

RTR operate in a market that is primarily the manufacturing industry, providing services that support the customers need to stay on top of the competition by inventing new ideas and one of a kind design you just cannot find on the shelf.

SERVICES:

- Preventative Maintenance
- Machining
- Fabrication
- Machine design
- Break down trouble shooting

RTR PROMISE

RTR strive to get better and improve using our philosophy of continual improvement

Our Promise: To give the best and be the best and make our customers addicted to us.

MACHINING SERVICES

RTR AUTOMATION MACHINING SERVICES

RTR offers a vast range of machining experience; our team has over 60 years of experience between them and have been a part of some major projects in their careers World Wide.

Our ability to offer exceptional replacement parts or machining parts for one of our many projects that we offer to our customers is what separates us from the rest.

TYPES OF INDUSTRY

RTR produce unique parts and one of kind pieces to our customers.

- Tool & Die.
- Machine parts.
- Prototype parts.
- Punches

SERVICES:

- Preventative Maintenance
- Machining
- Fabrication
- Machine design
- Break down trouble shooting

RTR PROMISE

RTR strive to get better and improve using our philosophy of continual improvement

Our Promise: To give the best and be the best and make our customers addicted to us.

RTR PREVENTATIVE MAINTENANCE THREE TIER

RTR AUTOMATION THREE TIER PREVENTATIVE MAINTENANCE, KEEPING YOU PRODUCTIVE.

At RTR nobody knows more than us what it means to have your plant up and running at peak times. That's why we came up with our three tier programs to keep you on track with timely maintenance to your assets.

How does it work? All machines start out in their ideal condition when initially made, but over time they begin to wear and with lack of maintenance this only contributes to their demise.

TIER III: Tear Down

Disassembling all major parts and recording wear in its current state, repair or replacing of these parts will bring it back into its ideal state.

TIER II: Condition Monitoring

Once an asset has been brought back to its ideal condition it is important to keep it this way. So by looking at the finer details and taking the time to check loose connections and fraying components will ensure longevity of the work carried out in Tier III.

SERVICES:

- Preventative Maintenance
- Machining
- Fabrication
- Machine design
- Break down trouble shooting

TIER I: Lubrication and Cleaning

Frequency of lubrication and cleaning is crucial. It is pointless going months sometimes years without doing this task and expects it to stay in the condition you worked so hard to get it to in the first place.

That's why we come back at a pre-determined time to perform this step.

This will ensure we keep it in the ideal condition and on occasions go back to Tier II to start the process again.

BREAK DOWN SERVICES

RTR AUTOMATION BREAK DOWN SERVICES

The RTR team was born out of the automotive and manufacturing world, with advanced knowledge of technical systems that drive these industries we have gained a huge amount of experience in trouble shooting equipment.

Our ability to be able to evaluate complex electrical and mechanical controls that are prevalent in all of today's modern machines is something we take a great pride in.

Types of areas we specialize in:

- Robotic
- Pneumatic
- Plc's
- Electrical
- Mechanical

RTR offer call out services to its customers, if there is one thing that can ruin a day's production is a machine that is down.

We can help, and are always up for a challenge when it comes to technical issues.

SERVICES:

- Preventative Maintenance
- Machining
- Fabrication
- Machine design
- Break down trouble shooting

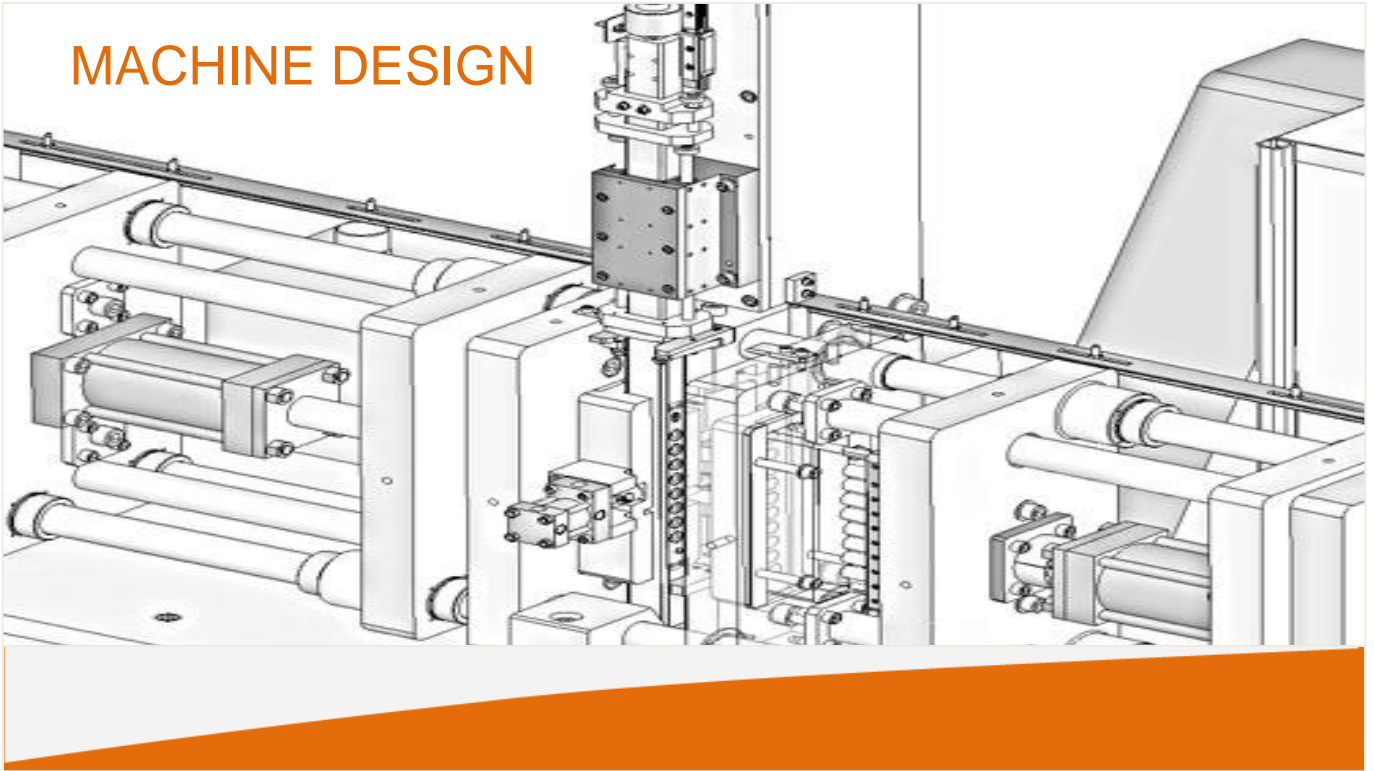

RTR PROMISE

RTR strive to get better and improve using our philosophy of continual improvement

Our Promise: To give the best and be the best and make our customers addicted to us.

MACHINE DESIGN

RTR AUTOMATION. MACHINE DESIGN

If there was one discipline that makes RTR in a class of its own it has to be machine design and prototype. We have had the privilege to give our customers some of the most innovative one of a kind product in the market, which gives them the competitive edge on their competition.

If we were to tell you of some of the designs we have been a part of, you would be astounded with the quality of skilled craftsmen we have. Of course to stay within our confidentiality agreements to our customers we can only give you the types of industries:

- Automotive Industry.
- Food Industry.
- Window & Door Industry.
- Chemical Process Industry.

SERVICES:

- Preventative Maintenance
- Machining
- Fabrication
- Machine design
- Break down trouble shooting
