NIFSAB

About this Seminar:

This seminar will discuss the changes that happened between the 2019 and 2022 editions of NFPA 13D and 13R. We will also discuss what may be ahead in the 2025 editions as the documents have entered into the next revision cycle. There will be a lot of information on meeting the requirements of the International Residential Code and how it impacts meeting the minimum requirements of the NFPA Standards. From multi-use occupancies to garages, there are many things that can affect the design, installation and approvals for these systems.

We will look at the practical application of the standards and discuss plan review, rough-in inspections and final acceptance. There will be plenty of interactive exercises and time for an open question and answer period.

Mundelein Fire Department

April 5, 2023
9AM to 3PM
(after NIFIA)

About the Instructor:

Cecil Bilbo is President of the Academy of Fire Sprinkler Technology in Decatur, IL. He started his career in the field, installing sprinkler pipe, in 1986. In August of 2009, he created the first-degree program specifically for the fire sprinkler industry at Parkland College in Champaign, IL. Cecil is an author and contributor to the handbooks for NFPA 3, 4, and 13. He is a member of the NFPA 3,4,13,14,25,72, 88A, 101, 101A, and 5000 Committees. As the father of three grown children and grandfather to seven, he appreciates how hard it can be to learn new things. That is why he teaches!
