HE&W Consulting | “Enabling a Sustainable Future”

[consulting.heandw.com](http://consulting.heandw.com)

Welcome to HE&W Consulting, the Caribbean’s leading environment and water sector consultancy.

HE&W Consulting is a multi-disciplinary environment and water sector consultancy offering: **engineering design**; **technical consulting**; **project management**; **educational**; **research and development**; and **specialist advisory** services to clientele across the Caribbean. We are the regional authority on sustainable development, and we are here to serve *you*.

### Connected

We are proud members of HE&W Group, *the leading family of companies in the Caribbean sustainability sector*. This gives us access to a quickly expanding network of professionals, member companies, partners, brand suppliers, software developers, and more.

### Our Mission

We exist to **enhance** Caribbean societies and economies, **protect** our vulnerable communities and the infrastructure, and **preserve** our environment and natural resources. This aim is achieved through the consistent application of best practices on all our projects, and the development of novel solutions which are fit for the Caribbean context.

### Experience and Expertise

Our 9 areas of expertise are listed to the right. Our team draws from **more than 100 years' combined experience** across these disciplines, ensuring the delivery of industry-leading service to you. Whatever the challenge, however big or small, we are here to contribute to the development and successful execution of your project.

### Areas of Expertise:

- Infrastructure and Development
- Environmental and Natural Resources Management
- Hazard Mitigation and Disaster Management
- Wastewater and Solid Waste Management
- Environmental Toxicology and Public Health
- Agriculture, Fisheries and Aquaculture
- Environmental and Natural Resources Economics
- Knowledge Sharing and Capacity Building
- Policy and Legislative Development

### Locations:

**Barbados**      **Bahamas**  
**Belize**        **Guyana**  
**Jamaica**

## Our Services:

Our range of technical and non-technical services are designed to meet the diverse needs of the Caribbean environment and water sector.

### Engineering Design

We carry out the detailed civil structural, coastal, hydraulic and environmental engineering design of infrastructure of all types. What's more, we consistently incorporate climate and hazard resilience into our designs to ensure longevity of use.

### Technical Consulting

Whether environmental impact assessment, urban planning or coastal flood modelling, our technical consulting services help us to create safer and more sustainable environments for communities across the region.

### Project Management

Quality, time and cost are the three words which guide our project management work at HE&W Consulting. We consistently apply industry-leading best practices to ensure a seamless process from project inception to completion.

### Educational

Knowledge sharing is an integral part of what we do. Through the design and execution of workshops, seminars and public education campaigns, we are building regional capacity to meet today's environment and water sector challenges.

### Research and Development

Our research and development work helps us to understand what is unique about the environment and water sector challenges we face in the Caribbean, and to innovate, develop and implement fit-for-purpose solutions.

### Specialist Advisory

We give sound technical and non-technical specialist advice to clientele across the region in all of our areas of expertise; backed by years of practical experience, innovative leadership and industry-leading research.

## Analysis and Modelling

We make use of industry-leading analytical and modelling tools to test our engineering designs and other solutions. In this way, we are able to better understand and predict their performance in the real-world environment.

## Our Project Management Approach

We are certified to the Project Management Professional (PMP) level with the Project Management Institute (PMI), and are well equipped to bring your project goals to fruition on time and to budget.

## Our Research-based Approach

As a point of principle and passion, our team of experts remains abreast of the latest developments in our field. Through our commitment to research, we are able to apply leading best practice approaches to the design of solutions *for you*.
