

Trailer Owners—

Liqua-Lube® It! Or You'll Lose It!

The problem with traditional grease lubrication for trailer hubs is you never know when (or where) you'll run out of grease. When you do, you're stuck on the side of the road wasting your precious weekend or vacation time.

Keep On Rolling

Fortunately, there is a solution. Liqua-Lube is the first trailer hub lubricating system that uses liquid lubricants instead of grease. Liqua-Lube is a superior system that protects hubs and prevents breakdowns. Its clear cap lets you see the lubricant level, so you'll never run out of lubricant again.

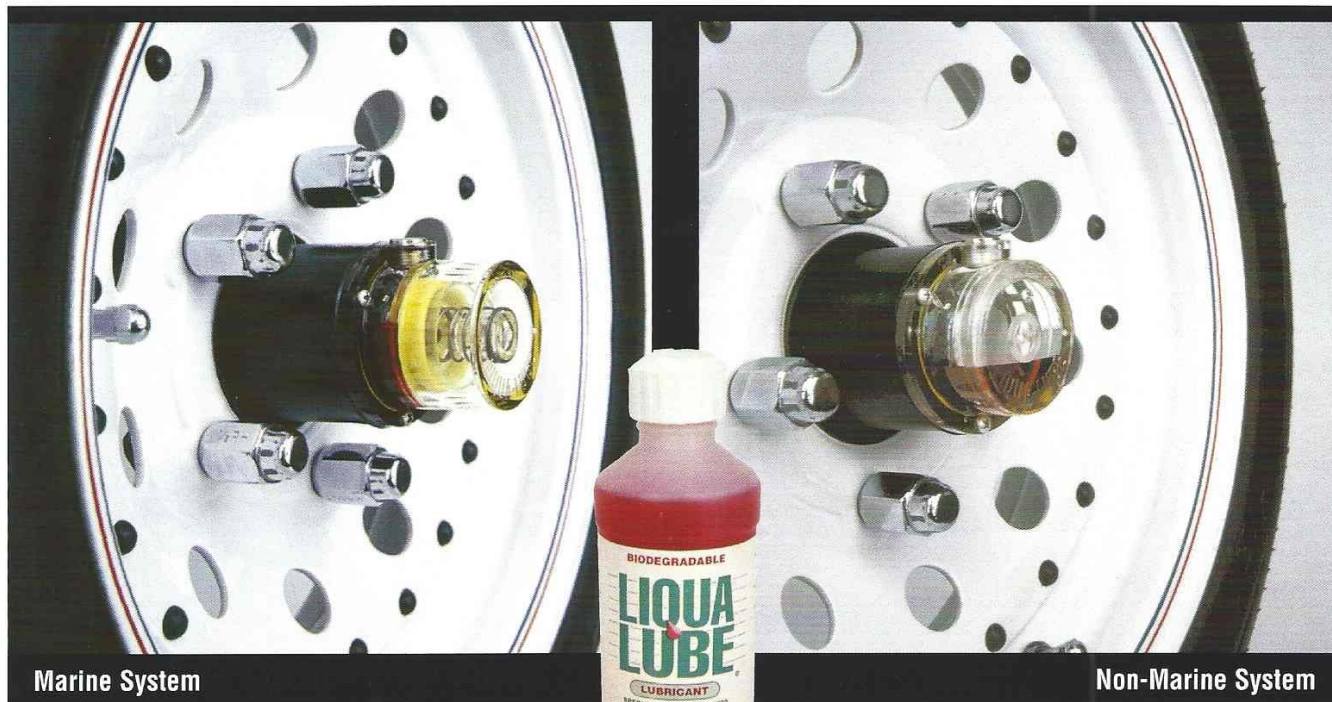

The Liqua-Lube System virtually eliminates dirt and water contamination – the major causes of bearing/hub failures. And while grease may not stay on your bearings, Liqua-Lube's lubricant adheres to wheel bearings, continually lubricating them while in motion.

Liqua-Lube also eliminates the need for messy and expensive bearing repacks. The savings over annual bearing repacks can pay back the cost of the Liqua-Lube System in a very short time.

Designed For Marine and Non-Marine Trailers

Road tested over one million miles!

There is a Liqua-Lube System for marine trailers as well as camper, snowmobile, and utility/construction trailers. Both marine and non-marine systems are easy to install and use the same 100% synthetic biodegradable lubricant.

The Liqua-Lube System Includes:

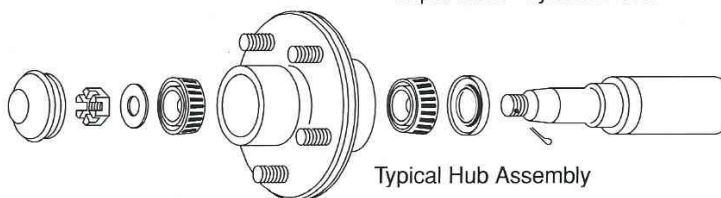

- 2 - Clear Hub Caps
- 1 - Bottle of Liquid Lubricant
- 2 - Stainless Steel Spindle Sleeves
- 2 - Spring-Loaded Seals
- Hardware and instructions necessary for installation.

Chrome rough-service hub covers available.
