Referral Requirement

Clients are eligible for clinical hypnotherapy services that address their medically diagnosed issues only when referral or prescription from the treating physician is received.

The treating physician is not responsible for the self help training provided to their patient by the clinical hypnotherapist.

Because hypnotherapy is a proven, strong and effective mode for change it is required by law that the treating physician be aware of the use of hypnosis for medically diagnosed issues.

Historically, clients who receive a referral and/or prescription for clinical hypnotherapy services are more likely to qualify for reimbursement through their insurance company's alternative healthcare policy.

Physician Referral Authorization
