## **AWARENESS**

While there are many variables involved in why someone commits these horrific acts of violence, there are definite signs to look for to identify an Active Shooter before they create a Mass Casualty Incident (MCI).

Our training will give you the necessary tools to identify an Active Shooter  
**- BEFORE -**  
an attack occurs.

## **RESPONSE**

Once an Active Shooter attack begins, there needs to have been a plan in place and practiced to give yourself and those you are responsible for the ability to successfully survive the attack.

The training we offer will teach those in attendance, what steps they can take to survive and if necessary incapacitate the Active Shooter.

## *Risk Assessment and **"HARDENING"** Your Location*

An added benefit of our training is we will assist you in developing a Risk Assessment and Policies and Procedures to make your location safer from and during an attack.

**“Chaos, panic and fear can only be minimized -never eliminated- when it is preceded by preparation and planning.”**

**Are your people ready for an Active Shooter?**
