

HAUSER BUSINESS ENTERPRISES INC

Hauser Business Enterprises is a versatile company that specializes in providing only the highest quality and most timely delivery of our wide offering of services. Our modest size imparts us the advantage of giving each operation we perform the full attention our customers desire. We are always available and ready to respond to requests in mere minutes, where larger companies may take hours or days to implement change. It is our commitment to our superior process that enables us to provide customers with superior results. Our long term goals are to continue to diversify the operations that we support at HBE and expand the list of customers that we provide service to.

3RD PARTY CONTAINMENT

With our team of quality control inspectors, we scrutinized over 350,000 automotive parts and had only 12 failures leaving our facility. This represents a failure ratio of nearly 1:30,000. In this time we found over 40,000 rejected pieces per the criteria of our customer, which was amended on a daily basis. We have provided a timeline of our 3rd party

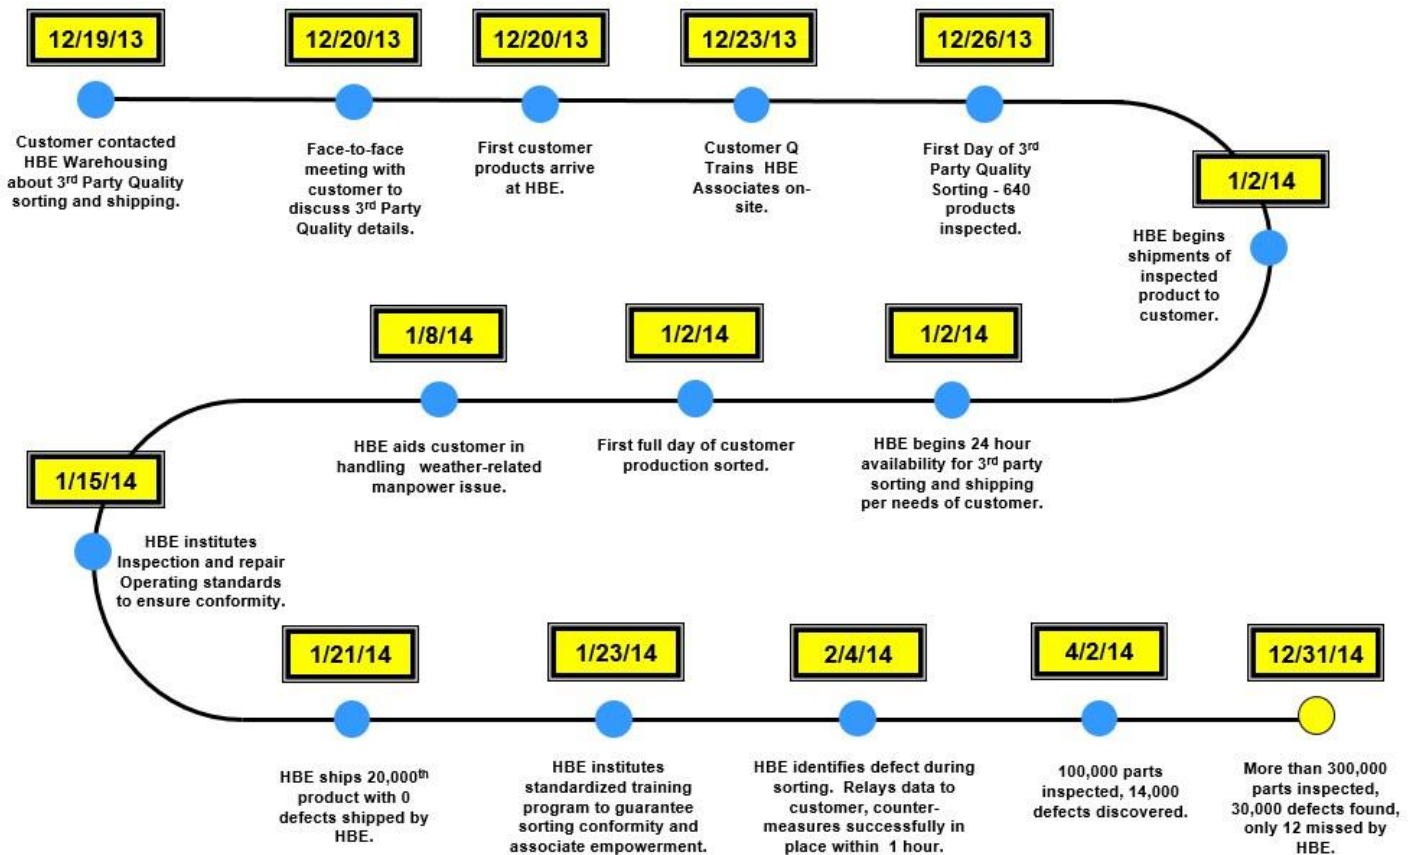

containment operation on the following page.

For other operations, we verify approximately 10,000 parts a day and identify defects that are made in the manufacturing process. After identifying defects we rework the product to meet manufacturer specifications. We can provide 3rd Party Containment either in our facility or at a customer's location. We have the equipment to

provide transportation of product to and from customer locations. All databases were developed in-house tailored to the customer's needs. They are recorded and reported to the customer on a daily basis. This enables customer to identify problem areas and processes.
