

Consulting & Product Development

Do these questions hit a nerve?

- ≥ In need of new products and ideas to set your company apart?
 - ≥ Frustrated with a lack luster execution of customer and warranty support? Is it a continual headache with the Trauma Room-like atmosphere?
 - ≥ Tired of paying rockstar money to personalities for the use of their name, when their notoriety is more valuable to them than your return on investment?
 - ≥ Do you even have an intelligible, articulate, and concise manual for your factory certified armorers?
 - ≥ Do you provide periodic firearms safety and product familiarization courses to your employees? Or is it incumbent upon them to seek out every change and nuance that set's your product apart?
-
- ≥ Firearms Training
 - ≥ Consulting
 - ≥ Product Development.

z3ro SOLUTIONS, LLC

Who and what are we?

z3ro takes its name from the background of its founder and owner. Pronounced "zero-three", which is the USMC occupational field identifier for the infantry. The name z3ro Solutions harkens back to our history of fixing problems with infantry or grunt solutions.

Professionally, the owner's background is that of a Marine grunt who served in an Amphibious Raid Company. That Grunt took his drive and experience and excelled as a professional stuntman for 5 1/2 years both in live action and film work. Injuries lead to a career change and Gunsmithing became his new avenue to seek national service. After a short stint in the firearms industry with XS Sight Systems, he was contracted to work at the US Department of State, Bureau of Diplomatic Security. During 5 1/2 years there he served DEAV as an Armorer before donning a Red Shirt with the Firearms Training Unit as a Senior Instructor.

"Zero-Three" offers timely and coherent firearms training, consulting, and product development services. We are looking for forward leaning, innovative partners in the Firearms industry.

Firearms Training & Instruction

Training

z3ro Solutions, LLC offers a practical and holistic approach to firearms training, both in the classroom and on the range. We do not offer “basic” or “advanced” training because the vast majority of end users fall somewhere in between. We offer foundational training which all shooters must possess in order to nurture the skillsets and confidence to perform to a higher standard. We quickly identify those thresholds then work to compress those transcendent fundamentals under time, distance, and to a higher standard.

z3ro's course disciplines:

- z3ro Pistol
- z3ro Carbine
- z3ro Combine (platform integration)

Instruction

z3ro Solutions, LLC. offers end user and armorer level instruction which covers the often ignored subjects such as shop management and inventory tracking to firearms theory and design. Any armorer can drive a hammer and punch, but an armorer who is an asset to their end users and command / management is a highly skilled diagnostician who understands the end user's needs, agency procedures, and manufacturers design intent. The z3ro trained armorer will understand not only their role as the armorer (micro) but equally importantly the armories roll in the big picture (macro).
