- Repetitive Stress/Strain Injury (RSI)
- Tendonitis
- Gout
- Post-Operative Recovery
- Arthritis Pain and Inflammation
- Bursitis
- Other Soft Tissue Knee Injuries and -
- Chronic Conditions

AGENTS WANTED

PREVENTION & Management From Sports Injuries

Playing sports is good for your health, but sometimes you can injure yourself. Prevention of training injuries is far easier than fixing them afterwards.

There are so many reasons sports injuries can be caused by, for example, not warming up properly before exercising and pushing yourself too hard or using inadequate equipment. According to the American College of Sports Medicine, up to 50 % of all athletic injuries can be avoided if athletes take appropriate preventive action.

SOLUTION FOR SYMPTOMS THAT CAUSE PAIN AND DISCOMFORT AND PRE INJURY MANGEMENT.

Timely use of Stay warm Wrap after any intence activity or sports can prevent muscle and Ligaments from fatigue, Long time negligence taken could cause serious bone or muscles injuries.

Our FIR Heat Therapy Wrap relaxes your muscles, tendons, and ligaments with soothing heat to increase your flexibility and blood circulation thereby relieving the sensation of pain.

How does it work ? Staywarm Heat Therapy Wraps are constructed with our patented pending carbon fibre heating system that uses tiny un noticeable conductive fibers that provide instant heat.

The LED Color indicator on the product clearly indicates the required setting, which makes it easy to identify the power setting on the device. With similar products the battery pocket is stationary and in some cases very inconvenient, but Staywarm Therapy has incorporated our new flex pouch battery pocket that allows you to place the battery anywhere on the wrap. This allows each individual user to place the battery in the locations that best suits them and their use.

The Staywarm Heat Therapy Wraps heat through conduction. This means that the heat flow is transferred into your joints and muscles due to direct contact.

By using conduction, we can effectively heat targeted areas using a rechargeable 7V Lithium battery.

Staywarm Heat Therapy Wraps provide hours of soothing warmth to help rejuvenate sore joints and tired muscles.

DEEP PENETRATION THERAPY

FAR INFRARED RAY TECHNOLOGY

F.I.R. Technology transforms light energy emitted by the sun into therapeutic heat energy that stimulates the body's natural healing capabilities and lymphatic movements to get rid of toxins and oxidative stress.

HEAT THERAPY

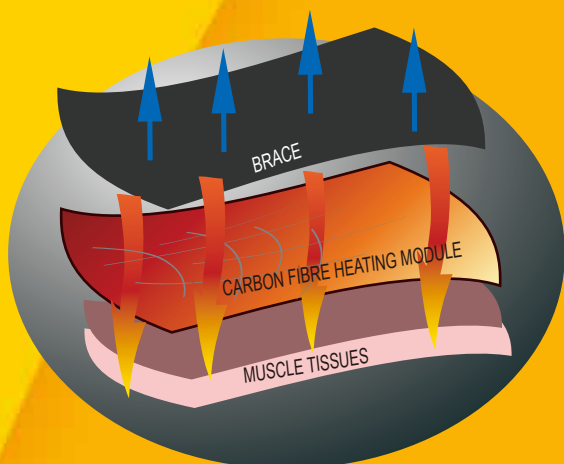

Heat therapy is the most recommended non-invasive, non-pharmaceutical form of pain relief and rehabilitation by physical therapists and medical professionals alike.

CONVENIENCE

The revolutionary design brings the power of Far Infrared lamps seen at the doctor's office into the convenience of your home!

SAFE LOW-VOLTAGE

Our heat therapy products are low-voltage and produce virtually no electromagnetic fields (EMF) for your safety.

Taiwan MEDICAL DEVICE LICENSES APPROVED

SPECIFICATION

Safe, Far Infrared Ray (FIR) Heat
Automatic 5-Minute Safety Timer
Personalized Temperature Controller

3D TAILORED. ADJUSTABLE. FORM-FITTING.

3D tailored and anatomically designed garment positioned directly on the elbow back area to fully relax tense muscles, ligaments, and tendons.
