

Trigger Point Therapy and Counterstrain

with Dr. James Mally

April 3, 2020

Friday 9 am - 6 pm (8 hours)

\$150 + \$10 materials

Learn a painless and effective way of releasing trigger points!

If you have had trigger point work you know how painful the treatments can be. Fortunately there is another therapy that works synergistically with trigger point work to make it painless and even more effective.

Strain Counterstrain work, also known as Positional Release, uses positioning to help reduce the pain-spasm cycle for effective trigger point release. Once you learn the principles of this work you can apply it anywhere in the body.

In this class you will learn:

- different types of trigger points
- how to find trigger points
- common referred pain patterns
- how to position your client so there is no pain during treatment
- body mechanics to make this work easier for you

Trigger points are a major cause of musculoskeletal pain, so this work can help your clients to become pain free.

Extensive notes will be provided with this class.
