

## TRU LAST UR-90

### HIGH IMPACT URETHANE BASED PRODUCT

*SOLVING ABRASIVE WEAR PROBLEMS IN THE MINING,  
AGGREGATES AND POWER INDUSTRIES*

Different types of abrasion problems require different types of materials. One material will not work well in all types of applications. With this in mind **TRU STEEL METALS** has a unique polyurethane having the most outstanding combination of properties available for abrasion resistant applications. **TRU LAST UR-90** has been specifically engineered to defeat sliding, tearing and impact abrasion found in applications in the mining, cement, utility, aggregate and material handling industries.

### AVAILABILITY

**TRU LAST UR-90** sheets are available in standard 48" x 120" sheets either plain, solid metal backed, expanded metal backed and fabric backed. **TRU LAST UR-90** is also available in shapes to fit your specific equipment.

\*Please ask your *TRU STEEL METALS* representative for more information.
