SHREDDING OPTIONS

Your Security

Information is your most valuable asset. Protecting your assets should be your number one priority. Protect your business, business partners and your employees from identity theft and corporate espionage.

On-Site Destruction—Secure Shred provides locked security container. Our Service Technician will pick up and transport all your confidential documents and other media to our mobile shredding vehicle.

All information is immediately destroyed on your premises on each service day.

A certificate of destruction is provided at the conclusion of each service.

All shredded paper will be taken to the Albertville-Boaz Recycling Center to be baled and recycled.

Off-Site Destruction—Secure Shred also offers off-site document destruction. This type of destruction will take place at designated areas.

Cost Effective

Save yourself the trouble of in house shredding or other expensive shredding services. Using our program will help make your employees more productive, help you save on labor costs, or eliminate high cost from most on-site shredding services. We can shred in minutes what most office shredders can destroy in hours or days. Monthly shredding or one-time purges are our specialty.

Environmentally Friendly Service

Secure Shred recycles approximately 100% of all material that is shredded on a daily basis. Therefore it is an environmentally friendly service.

By utilizing an on-site document destruction service you will help the environment. The recent increase in recycled paper products has helped limit the amount of trees cut down each year.

Legal Compliance

Consumer protection laws, medical privacy regulations and rules regarding financial information are only a few areas in which organizations must monitor the daily security of their confidential information. Significant fines could occur and secret company information stolen or lost if organizations do not comply.

Security

Security is achieved through the use of our key locked security consoles. Each are equipped with slots to conveniently place confidential information into the bins. These bins are strategically placed throughout an organization's facility to encourage the usage by its employees.

Company Summary

Secure Shred is a professional paper shredding company, providing the most secure, efficient, simple and cost effective plan available for destroying a company's confidential information. Secure Shred provides complete on-site and off-site document destruction services. Secure Shred works in conjunction with Albertville-Boaz Recycling Center.
