

# AFFORDABLE EQUINE LUXURY

Improve equine health with the **Equine InfraVent Therapy™**, available exclusively from Euro Equine Imports

## FEATURES

- Deep-tissue therapeutic heat to improve performance in younger animals
- Promotes equine wellness in just 20 minutes daily over the course of 7-10 days
- Infrared therapy to target arthritis in senior horses
- Added benefit of rapid, easy coat drying during grooming

## Total horse wellness, from the inside out

The **Equine InfraVent Therapy™** system harnesses the power of infrared light to alleviate horse health problems such as stiff joints and post-exercise pain.

The red light therapy penetrates up to 1.5 inches of skin and tissue, allowing soothing warmth and infrared stimulation to reach deep inside the equine's body.

The **Equine InfraVent Therapy™** system consists of a 15-bulb heat lamp suspended above the horse. Each bulb is calibrated to target specific zones of the equine's anatomy, allowing a comfortable warm breeze to wash over the animal's top line and sides. The infrared heater inducts up to 470 cubic feet per minute with an ideal, tempered airflow. As an added benefit, the infrared light also speeds up the drying process.

Whether your barn has yearlings, tranquil seniors, active athletes or top-level horses of any discipline, the **Equine InfraVent Therapy™** system is perfect for keeping all of your animals comfortable and pain-free for years to come.

# THE INFRARED THERAPY SYSTEM FOR EQUINES

*Scientifically proven to provide infrared pain relief in a calm, relaxed environment for all of your horses, young and old*

## Positive impact on horses' health and well-being

- Increased circulation and tissue hydration in all horses by up to 400%
- Reduces back, sacroiliac and lumbar pain in young, fast-growing animals
- Improves stamina and reduces injury recovery time for race horses
- Alleviates chronic muscle pain and general stiffness in senior equines
- Helps heal strains and sprains
- Reduces joint inflammation
- Improves collagen's extensibility
- Dries damp coats quickly
- Provides affordable equine luxury

## The story behind equine infrared heat therapy

The use of equine infrared heat therapy dates back to the late 1990s. It was first employed in Europe by equestrians to soothe deep tissues and dry outer coats simultaneously.

If applied correctly, infrared light therapy helps to prevent equine injuries, condition animals and promote healing. The deep penetration increases the horse's heart rate and volume, improving cardiovascular health. The same technique has been used by NASA since the 1980s to condition astronauts' cardiovascular systems during long space flights.
