

## Diabetic shoes

In 1998, congress passed the diabetic therapeutic shoe bill which made it possible to provide patients with diabetes extra depth shoes and inserts funded by Medicare. Dr. Williams can provide diabetic shoes and inserts for patients who qualify under this program. His office offers a wide array of diabetic shoes from several national shoemakers. He will evaluate each diabetic patient for qualification for diabetic shoes and help the patient pick the most appropriate diabetic shoe and insert.

Dr. Williams has established himself as an expert in the treatment of diabetic foot complications in the Clearwater/Palm Harbor and surrounding areas. He has experience in treating, managing and preventing diabetes related lower extremity complications.

There are dozens of studies demonstrating the correlation between foot pressures and ulceration formation in diabetics. If you are a diabetic and have questions about diabetic shoes call today for an appointment. Dr. Williams will evaluate you and your feet to see if you qualify for diabetic shoes under this program. Don't let diabetes take control, start protecting your feet today!
