

## Logan

(Owned, Trained and Handled by Tammie Coffman)

DOB: Estimated 2004

K-9 Logan is a Beauceron-mix who was rescued out of a storm drain. While sitting on the floor with him in the veterinarian's office that day I knew he was destined to do great things. And he has! K-9 Logan started his career in obedience training before transitioning into search and rescue work. He was certified with NASAR as a Canine SARTECH Human Remains Detection Land Type IV and Canine Human Remains Disaster Responder Type 1 Forensic level. K-9 Logan was also certified with NAPWDA and NNDDA. He has attended numerous searches, workshops and seminars throughout the southeastern United States. Unfortunately, K-9 Logan's career was cut short due to medical complications associated with Addison's disease. He still resides with his owner.
