

Fw: 1/2 CONFIDENTIAL For: Judge Economou

J Futerfas

Tue 2/20/2016 1:00 AM

To: J Futerfas <jfuter@hotmail.com>;

First email series (1/2) to Judge Economou in c/o Ms. Carla Neal. This information will be sent via ground mail initially and is for review of concerns regarding the death of Beatrice Van Welde (Manatee County probate) and her brother Ed Sampson and related extremely serious matters. Also included with this mailing is two letters to the Florida Bar (6.8.17 via mail and email - letter, list suspicious deaths; 12.30.17 via mail and email - includes two letters dated 12.11.17). Also included, for further perspective, is my complaint regarding UM to the Joint Commission (7.24.16) and regarding my cousin's suspicious death at Bethesda Hospital (8.14.16), time-lined in hacked emails, illegally held in restraints. My recent timeline of complaints and retaliation at the University of Miami submitted to the HHS OIG, Washington, DC (10.5.17) is also enclosed.

Dear Ms. Neal,

I have concerns about nefarious circumstances regarding the deaths of Beatrice Van Welde and her brother Ed Sampson (as well as others). I am also concerned about this in regards to undue influence on the attorneys, guardian Shirley Vermillion, and the notary of Bea's Will, Melissa Flannery in Ohio. Bea's estate is currently in probate in Manatee County and I am named in her Will. These two emails and the attached 6.8.17 and 12.30.17 letters to the Florida Bar (the latter includes 12.11.17 letters) are quite explanatory regarding the etiology of these concerns. (The list of suspicious deaths is not inclusive.) These emails mention the "LINKS" page on my site ourconstitution.info. That page is temporarily off-line, although the others are active. I note in my emails (email 2/2) to the City of Miami Police, conversations of concern at Pinecrest Market while I have been handing out my US Constitutions. Some of the comments related to politics and disparaging the law are extremely disturbing. The fact is that people have died clearly maliciously (someone I knew was a UM [University of Miami] patient whose death was time-lined with hacked, morbid emails to me, she was also held illegally in restraints which I only knew because UM sent me a training on restraints for the first time in 12 years [I didn't have patient contact in my job], etc.). I feel that this was in retaliation for (and occurred soon after) my complaints about UM to the Joint Commission (includes the threat to me and suspicious cancers in younger women mentioned in other complaints against UM. I had worked at UM abstracting cancer cases and I was threatened by my boss Stuart Herna because I had, "complained about a lot of people"). Deaths have also included very healthy people just not waking up, heart attacks time-lined with certain other events, and other awful occurrences (City of Miami Police has these documents). Several of these instances of concerning deaths followed some specific complaint of mine and some have dates I am familiar with, such as birth dates of family members, including Bea's day of death, on the 18th. (My brother Alan's birthday is December 18th. He is a criminal defense lawyer who has contributed to the firing of one or more FBI agents during the course of his work, the details are unknown to me but likely for unethical and/or illegal activities. Susanna Arias Morales, a supervisor at UM told me pointedly, about 2011, during a lawsuit against UM, that she had a relative in the FBI. Despite the highest levels of hacking, threats, suspicious deaths, etc. reported to the FBI, I have not had one call back from them.) I do have concerns that the FBI is involved maliciously as well in my complaints -- this is not uncommon in their history. Moreover, after my EEOC complaint against UM in April 2009, there were two suspicious deaths of long-time family friends, as outlined in the Florida Bar attachment (6.8.17). One was 1.13.10 (my mother's birth date is the 13th) and this woman's son, who was visiting her, a career Navy officer stationed on submarines, on 12/27/09 (my dad, a retired General Master from the Miami-Dade Court system, has his birth date on the 27th). The son supposedly died of a stroke and the mother out of shock from learning about that. You will also see in the attachment that Senator Rubio, as far as I can tell, did not one thing to try to help the restrained patient although I emailed him prior to her demise (as well as President Obama but that letter arrived after her death). The other letter included is my last correspondence with the Florida Bar (12.30.17); it appears they are also helping to cover this up. Please bear in mind

CONFIDENTIAL

that phone lines and computers, and contacts, mine as well as other family members, were compromised at the highest of levels, at one point emails disappeared in front of my eyes. This also happened at UM and there is much documentation with IT there (I have copies). Our liberty and democracy clearly appear to be in grave danger, from within. People I have mentioned in these enclosed complaints, know the origins of this horror. The perpetrators are obviously being protected and are clearly high-level workers of some type. Are they perpetrating these crimes on their own or someone else's dime? This is illegality of the highest of magnitudes, in my opinion worse than treason. We cannot allow this type of barbarity to continue and I hope someone will investigate, and hold those responsible, accountable.

In fact, there was never any response from the Boynton Beach City Attorney Cherof, State Attorney Aronberg, or Mayor Grant regarding that time-lined death of the restrained UM patient at Bethesda Hospital East. Even the local Boynton Beach Police were evasive and misleading, stating that an investigation was done although there was no documentation when requested via the City portal. Officer Jeanniton, who took my complaint of concern for the patient, never responded to my follow-up requests. It was after I filed my complaint via phone with him that the patient was illegally put in restraints, later that evening. Another concerning death is Snooty the Manatee, on or about the 21st, also a very familiar date. One of the other circumstances of Ed Sampson's death that I can't help but note in light of this situation, was the date, February 22, which is also Washington's birthday. This is concerning in light of the conversations I have had while handing out my US Constitutions, and the vast seeming disregard for the law and desire to bypass the judicial system. Please read below also for what Bea's guardian Shirley Vermillion had told me about the circumstances of Bea's fall as compared to what the nurse/owner at the home had stated. As further information, UM fired me 6.12.17 after 12 years, and a good evaluation and \$10000 raise, about two weeks after I responded to the evaluation honestly about the threat and what has been going on there. The hostility in part is in retaliation for multiple reportings over the years of manipulations of cancer data to overseeing authorities, and for reporting other retaliation, both in direct violation of State law. As stated, this hostility at UM has been going on a number of years and I recently sent a 174 page complaint to the HHS OIG, time-lining the retaliation and my complaints should you wish to have that. I am sure the State is involved (HHS/OIG), as well as an FWS (State Fish and Wildlife) employee, Richard Flamm, and Susan Markiey, prior high-level Miami-Dade County DERM employee. One or more of these entities may have been the hackers of phone and computer. The State did not want to hear my further complaints regarding this State mandated cancer data (manipulations) -- referring me back to UM. I had also emailed Florida IG Boyd and ASAC Martens (in Miami) during this time. *I am sure UM was furious at me for reporting these manipulations to the State OIG. The State OIG closed their investigation into UM's cancer data manipulations about the end of 2014, stating that they could do nothing because UM employees are not State employees. However, the retaliation and deaths escalated further after that. I feel that UM pushed the State to contribute to and escalate this horror and unconstitutional retaliation against me. I feel that both entities are responsible for Bea's, Ed's and the multiple other deaths -- and that many other people I have mentioned were aware, and DID NOTHING. I believe the Florida Bar staff knows this truth. As further important background, the State Tumor Registry, Florida Cancer Data System, (FCDS), is located on UM's medical campus and is managed by, including the hiring and firing of employees, by UM. There are millions of dollars in federal (Centers for Disease Control) funding that are distributed to FCDS via the State Department of Health, FDOH. A State employee told me the State does not want to manage any more facilities, despite the clear conflict of interest currently regarding UM and FCDS. Moreover, my ex-UM manager's wife is a high level employee at FCDS. (I certainly would NOT go to FCDS with my data manipulation complaints.) Richard Flamm and all of those mentioned here know something (or more) about this -- but no one will investigate, or say what the truth is. Flamm is a State employee who I do not feel should be working off of my (our) tax dollars while his role in these very serious concerns is not clear -- it is a factor, for sure. Those at the highest levels of Miami-Dade County and UM (two of the most powerful institutions in our area) I am sure are also hiding the truth -- this is beyond unconstitutional and must be investigated and stopped, with punishment meted.*

I feel my concerns as stated here and in the 2nd email should be brought to the attention of the Court. There is much more documentation with the City of Miami Police, the Joint Commission, DOJ, etc. I am glad to forward any further documentation you request. These particular emails have further important information I also sent to the Southern Poverty Law Center.

I feel that this is concerning enough to request that Judge Economou decide what, if any role these circumstances have in regards to the probate, or what other investigation he may mandate. Obviously, my concerns are extremely serious and I

feel it is important that I share these concerns with the Court. I will add that I also find it strange that the notary, who was so quick to get back to me (even though she was off of work that day), regarding the signing of Bea's Will (the Court has those emails between me and that notary), seems to now be avoiding my attorney despite his numerous calls over the past months. Also, certain other aspects of this case, including certain timing and procedural details, raise my concern for outside, nefarious influence with the attorneys. (On Friday 2.16.18 I spoke with Bradenton attorney Trevor Quinlan and he told me of a specific offer [very small, and to be split] from the other side, including a likely very extensive nondisclosure agreement and said that if I did not take it he would withdraw and give me my deposit money back. He had previously told me, within the past few weeks (confirmed via email), what the process would be regarding settlement offers, and he then asked me how much I wanted to ask for. He said he would present that to other counsel and that I had the option to accept whatever they came back with, or not, and if not, I could continue to pursue the case. I believe discovery was the next action he mentioned.) The DAY PRIOR to this, on Thursday the 15th, my HR attorneys regarding the UM case (Gallup, a Broward firm), decided they did not agree with my position on terms for settlement should a letter be sent to UM (I preferred to go straight to a lawsuit as much correspondence has been had with UM already but they were new on this case and wanted to sent a letter), and they wanted to step out and also refund my deposit. In this case I accepted their offer. I have a strong, extremely serious case against UM and I feel those attorneys were only going to try to settle for some small amount, although they said they were open to a lawsuit if an agreeable settlement wasn't reached. They did not want to state anything specific in the letter to UM, the threat to me, the retaliation, the cancer data manipulations, etc. and were, to me, going easy on UM. (More importantly, I mentioned my idea of the amount of money I wanted to settle and I also stated that I would NOT agree to much of a nondisclosure as there were serious other criminal concerns that I wanted to pursue. They disagreed with both stands.) I felt there has been outside, illegal influence on these HR attorneys, (Gallup) and the prior HR attorneys (Saenz and Anderson), who I had for several years before they stepped off the case when UM fired me, when I needed them the most. Both these HR firms deny speaking with anyone outside of their offices regarding my case, but I do not believe that. I feel there is some outside influence in this case related to Bea now as well.

Please note, regarding some information below, that I had called South Carolina Congressman Gowdy's office on 1.23.18 -- I had estimated a different date in my note below but have confirmed the actual date. Nevertheless, that train crash soon thereafter in South Carolina (2.4.18) and the one days prior in Virginia (1.31.18) are both concerning.

Thank you very much again, Judy

CONFIDENTIAL

To: SPLC Investigations Staff,

Below are condensed letters conveying some of my concerns that I have submitted over the years to the City of Miami Police and other law enforcement and regulatory agencies. It is retaliation of the worst forms involving the University of Miami and likely the State and Miami-Dade County (at least). I have not yet sent the letter immediately below to Ronnie, at FWS (more about that in the letter below). I am not sure I will, because he never responded to the second letter below and likely would not to this one either. This unconstitutional horror is being covered-up at the highest of levels, including the Florida Bar.

I am a big supporter of the SPLC -- and agree with all the work you have done and all of your concerns. However, sometimes we must look in our "own backyard". Although a registered Democrat, I believe the left is much scarier than the alt-right at this point, and I describe my concerns below. Not the least of my concerns are that these individuals seem to be operating under the cover of legitimate organizations, including the highest levels of law enforcement. This actually is probably not new to you -- but I submit it is much more dangerous and scary than most of us want to imagine. At the end of the day, it is the organizations that are most threatening to our liberties and constitution are the most dangerous. Thanks in large part to your diligence, the alt-right, I do not believe, rises to that level of a threat currently. However, I believe these left leaning people (perhaps Deep State is the best term, maybe anarchists) work in our Intelligence, among other professions, and hence are more of a danger to our democracy and constitution than any other threat in the US currently. President Trump has his flaws, and worse, we all admit, but it seems to me he is more concerned than "the other side" about the usurpation of our democracy by those with power and with unconstitutional and unethical methods and beliefs. George Washington did not even believe in political parties and I agree with him -- we could get rid of them but people would fight losing that power and money. (Regardless, we should do that for the sake of the Country.)

I reference my online site ourconstitution.info below. If you read down a bit from the top of that site LINKS page, under Extrajudicial Killings in the US, I have a long narrative with the first few lines highlighted red. What happened to the white UM patient at Boynton Beach's Bethesda Hospital is unspeakable. I will also say that the two younger women I refer to, now with cancer, are both black. (I sent a complaint to the Joint Commission detailing the retaliation I had been subject to, the role those women had played [I am sure just "following orders" at UM/University of Miami], and my concerns for the etiology of their cancers. I am glad to send that report to you upon request.) I was threatened by my UM manager that something malicious happened at a surgery (elective, pathology negative) -- and am still being followed. I am also forwarding a report I made to the City of Miami Police (one of multiple emails to them). In this email (initially to Ronnie at FWS) I describe a concerning conversation on 4.2.17 at Miami's Pinecrest Market regarding Judge Scalia and Judge Thomas. On 4.12.17, the day after I reported that conversation to the Supreme Court Police (4.11.17), the black New York State Appeals Court Judge Sheila Abdus-Salaam was found dead, floating in the Hudson. She was the country's first female Muslim judge and first African-American woman appointed to the state Court of Appeals. (Some accounts state she had not been a practicing Muslim for many years.) She had marks around her neck, although how long they had been there is unknown. She was last seen on video walking near the river the prior evening. Her family and friends insist it was not a suicide. The papers had also falsely stated that other family members had died of suicide. I have not reported my concerns about this elsewhere but maybe you can do so or investigate this and/or some of my other concerns.

See below for more horror -- we are in a rapid descent due to extremely powerful, antagonistic, unconstitutional forces on our own soil. I am sending this out because people must demand reform of our powerful institutions/universities, intelligence apparatus, etc. -- and they must know about these abominable acts. I am glad to answer any further questions and submit any other documentation you request.

Thank you very much for your important work. Let me know how I can further help.

Judy

786-585-4769

Hi Ronnie,

I did mention some further very disturbing events in my last email to you (below). Do these concerns rise to the level of something you would investigate? I imagine if not your department, someone at the State (Federal Government?) would want to know about and perhaps look into these things? (There have been other very serious concerns since. I have mentioned some in this longer letter.)

You had asked me on the phone initially if I thought Dr. Flamm was mad that I did not get the brief manatee/boater paper to him -- I answered that I guessed so -- Susan Markley (or someone from the MDC [Miami-Dade County] MPPRC [Manatee Protection Plan Review Committee]) had scratched out the "MS" (degree) on my desk name plate for those meetings (in about 2009). This was after I spoke with Jay Gorzelany at one of the MDPPRC meetings (Gorzelany knows Flamm from Tampa). Markley was a bit weird to me, somewhat rude actually on a few occasions during the meetings. After the Committee sunsetted, Markley told me that her students had been taken away from her. She left the County (job) in 2011. While the Committee was meeting I did point out that, in violation of the Ethics rules, some of the members who were land owners on the Miami River were in a position to profit by some of the issues we were voting on, in particular regarding boat docks. However, nothing changed and these same members remained and voted on these and other issues. If you will recall, during my FIU MS research (2003) which was quite extensive, Flamm did receive the over 12,000 Excel boat data entries I cataloged (and the many subcategories within them), these same entries were also recorded in real time and then transcribed by me, and he also received the approximately 300 boater survey results (very detailed, extensive phone survey). I had also submitted three reports to the State and completed my thesis. I have offered several times to discuss any reasonable steps towards a resolution, also stating that this situation could have been handled better by everyone involved.

However, respectfully, in regards to your question about Flamm's level of anger, I think a much more important question is, "Is the vile hostility against me and those around me, that I have reported, including the hackings (phone/email home/work) and other extremely serious concerns, an appropriate response (from anyone for anything)?" Particularly concerning also is the fact that someone (or persons) may be on a taxpayer time-clock (or otherwise acting surreptitiously on someone else's dollars) while doing this illegal and unethical activity. Might Flamm be/have been committing some of these acts while on the FWS time-clock, or using FWS equipment? Markley as a County employee? Jeff Borg (ACLU) who I mentioned to you previously? Borg also has very extensive computer skills and I believe was possibly involved with prior phone/email hacking and for other reasons also, I feel was involved with extensive, ongoing purloining of my mail. These concerns have also been reported in detail to the police and USPS investigations. I do not need to belabor that we are dealing with, for the most part, seeming educated, intelligent people, volunteering/working to (ideally) try to better society, in an education, medical, and/or government forum. For whatever reason (I have mentioned this), I wasn't comfortable with that situation with Flamm at some point back then (2003), and it seems I was more than justified to be. It is also my right to have concerns, proven correct or not. There are a number of insightful, thoughtful, and measured responses Dr. Flamm, as someone in authority and a seeming educator and mentor, might have taken, especially regarding a student. For whatever reason, he apparently has simmered and stewed about this for years? I first contacted you a few months ago after Flamm was (strangely) at the Pinecrest Market here in Miami (he's from the Tampa Bay area). Please recall also that UM and likely the State and Miami-Dade County/Markley (she's also a UM grad) and Borg are also involved with this retaliation, perhaps directly more-so than Flamm. In any event, I am sure Flamm knows about it. Please also recall that the UM cancer data manipulations and the threat to me by my UM manager Stuart Herna (for complaining "about a lot of people"), both of which I reported numerous times before being retaliatorily fired by UM, were both illegal actions under Florida law. However, although the State did initially appear to be concerned, in the end they referred me back to UM for any further complaints. (The one UM Compliance Officer, Jennifer McCafferty, who was very concerned about my complaints and those from other UM employees, was run-off of the UM Medical campus several years ago and has since left the Gables campus and UM altogether.) UM Tumor Registry supervisor Susanna Arias Morales had also pointedly told me that she had a relative in the FBI several years ago -- I have yet to receive the first call back from the FBI despite numerous complaints over the years via their website as well as the DOJ and elected officials. These people I have complained about (I will provide all names if requested, you already have several) should be in prison, and certainly not near students, or working in law enforcement/any tax-payer funded job, or in fields that are established for the betterment of human-kind, such as medicine or education. They should not be in

Intelligence either, as little to no ethics and insight combined with high-tech ability and access, leads to unconstitutionality and worse. Moreover, something is very wrong with a person such as Flamm, his seeming passive-aggressiveness the least of concerns. No one in America should be subject to this hell and it should be stopped, and punishment (and counseling) required for whomever is involved. I am sure people of such intelligence and (literal) years of education can be a big help to other prisoners -- that really is the best solution from a number of perspectives.

In looking up Flamm recently I see that he is a geo-spatial analyst. That is particularly eye-opening in light of the horrid retaliation I have been subject to, and other very serious concerns I have had. He no doubt has high level computer skills, and knows others who do as well. Flamm probably also has the ability to track someone (or have them tracked, or worse) via satellite assistance -- and in fact may do this as part of his job? However, the concerns I have would NOT be part of his job description, are indeed beyond unconstitutional, and need to be investigated. Please recall that I did not know Flamm and Markley much more than by name -- nothing of much importance was ever discussed besides manatee/boat related. I do not know how Flamm ended up at that initial meeting in Miami where I met him, probably in 2000. I assumed then that most of his regular work time at FWS was spent on manatee/boater related research and data collections. If his work (or views/personal activities) entailed anything controversial, concerning, and/or unconstitutional, in my opinion, full-disclosure was necessary and warranted from the outset. It may be that he should not be working with students at all. I am also curious, as I have mentioned, why Flamm was briefly at the Pinecrest Market those weeks ago, hours from home (Tampa Bay area), catching my attention from over 20 feet away, walking right past my table where I was handing out US pocket constitutions, looking straight ahead, and leaving -- not saying a word.

Another strange occurrence happened a few years ago. I had reported to the City of Miami Police some years ago that two military members (a man and woman who said they were from Homestead Base) came to Fairchild Gardens while I was volunteering there. They had long lens cameras and were in uniform. (They said they were bird-watching.) They stopped to speak with me and at the time I thought the conversation became somewhat strange -- somehow having them question my loyalty (they thought Obama was not sending enough troops to the middle-east -- I was concerned about that strategy and for increased deaths and maiming of our soldiers -- they questioned whether I was referring to concern for our troops (versus civilians I guess [which I thought I had made clear and quickly reiterated I was referring to deaths and maiming of our troops] -- very strange incident). In hindsight, I do not think those military visitors to Fairchild were "bird-watching" although I believe they did take photos. When I have been handing out my Constitutions I have also had people stand right in front of me and take head shots, not saying a word. Please recall also that Rebecca Butler had shared photos of people I knew from an event that we both were at (I had gotten her the job at that party). I do not know with whom she shared these photos -- was Flamm one of these? Markley? Arias-Morales? Borg (knew of him from my few ACLU meetings)? I reported Butler to the police -- she had worked at Fairchild at that time referred to above (military personnel) and that is where I initially met her (years prior). Several of those she photographed/videoed at the party (or relations to them) subsequently died very suspiciously, within the year or so, all reported in detail to the City of Miami Police as well as the DOJ. Please recall also that the phone and email hacking of my accounts and of other people I know has been extremely severe with contact lists and emails accessed. The time-lined demise and death in Boynton Beach of the UM patient I knew was via morbid, hacked emails from a contact of mine. These hacked emails had been sent to the FBI with again, not one response. It was the Secret Service who, via phone (not even having copies to view), could tell that the email password had been hacked and that the account had been compromised. (I thought they were phished emails.) I was told to have the person immediately change their password. The FBI could have immediately told me this upon viewing the emails, but again, I never heard from them. Please know also that Butler was listed as a reference on a job application I had submitted (via online) to Baptist Hospital not too long before the Fairchild incident described above. I have little doubt that between the (unethical) communications UM has with other people and medical facilities, and the level of hacking of my emails, etc., that Butler was found out by UM (and/or Flamm, Markley, Borg) to be an acquaintance of mine. Butler I knew casually, from volunteering. She appeared to be in an unhappy relationship but was dependent due to her boyfriend owning the home. She had no substantive income herself and after leaving Fairchild was attempting to gain income from her artwork. She has tried to contact me since I have had concerns about her, despite my requests (verbal and email) to her, not to. I have reported her several times to law enforcement. Another extremely concerning event regarding Borg and Fairchild was reported to the City of Miami Police -- Borg was at Fairchild one day a couple of years ago while I was volunteering on a tram-ride with the children. I had recently been at an ACLU meeting (I will never go back), and Borg heard me say that I was a volunteer at Fairchild. I believe it was that next weekend that Borg was in the strangest pose as the tram came around the corner. He was sitting

CONFIDENTIAL

at a lunch table, turned away from the table, staring up at the morning sun, in a strong, deliberate pose, similar to a pose for a statue. It was a planned position, directly in my line of sight. That was the first and last time I had ever seen him at Fairchild. (I don't recall ever seeing him again since.) He is beyond scary and I have since learned that the ACLU has been known to be a cover for the CIA. That I believe -- I also know, however, that no one is above the law.

Our society is concerning for an evolving "police-state": certain people, not necessarily only law enforcement, but also those with high-level tech skills, feel they are "entitled" to act with impunity against others, as though they (the perpetrators) are above-the-law -- very dangerous in any society and certainly antithetical to our American Constitution and foundation. However, it would also appear that Flamm (and UM, State, MDC, FBI, Markley, Borg, etc.) feel that others (their targets), are beneath the law. Since I entered a bit more information on my website (ourconstitution.info) recently (1.30.17) regarding my concerns specifically about Flamm and Markley, (Borg had already been listed), horrid events have happened. (The next day the plane went down in Costa Rica with two medical doctors and their children from the Tampa Bay area, as well as a New York family, all deceased. They also happened to be Jewish, as Flamm and Markley [and Borg?] are). I consider the activities I am concerned about and have conveyed to you and law enforcement to be the most egregious imaginable, worse than treason. As a Florida resident, US taxpayer and citizen (helping to pay Flamm's salary), I am requesting an investigation into Flamm in these regards, and regarding what he knows.

Flamm also has affiliations with the University of South Florida, another extremely worrisome fact. Because my complaints are so concerning and involve Jews (and non-Jews), being Jewish, I have also reached out to members of the Jewish community within the past few months. Flamm had mentioned he was Jewish those years ago. A recent online link to him states he is now Christian (?) Regardless, I know these vile, hostile, and retaliatory actions are considered despicable by all mainstream religions and even by those who are non-religious. Clearly, this Country has devolved dangerously far from the humanity that our laws dictate and that I am sure most Americans aspire to. Please let me know if you will investigate in light of my further concerns here and below. I am glad to provide more specific details. I am sure Flamm knows much information, if not an instigator or perpetrator himself. As I told you, if I had the research to do over again, I would have stayed with strictly FIU faculty. In hindsight, it seems university professors have a certain level of compassion, insight, and understanding -- I guess they have to where students are concerned. They are also vetted for their particular work and that is very important -- it is not for everyone.

Further concerning, as mentioned previously and below, I believe the deaths of Beatrice Van Welde in Bradenton and her brother, Ed Sampson who passed in February of 2017 in South Carolina, as well as the extremely strange death of Bradenton's Snooty the beloved manatee, should also be investigated further. I am in Bea's will for a small amount but it would seem some entity is trying to circumvent that. Her brother, had he survived her, would likely not have contested the will. However, his children now are (despite the fact that they were estranged from Bea and even left her name off of her brother/their dad Ed's obituary although they mentioned their other brother). Ed was seemingly healthier than Bea but passed 2.22.17, of a heart attack (at 95 years old)? Moreover, the killing of the famous large tusker Satao II (in Kenya) last year in March, shortly after my Florida driver's license renewal in December 2016 (when I wore my Satao shirt and it was in the photo [entire photo is on file]), is also concerning -- that elephant had been around for 50 or more years. The tusks had not been taken. That was also quite a contentious time at UM and involved reporting Arias Morales' friend and recent hire (Monica Olivas), about February 2017 (to Herna), for her extremely poor abstracting skills and likely falsely "held" CTR credential. It is unlikely she would have been able to pass the test. I was fired a few months later.

Last week (2.2.18) I called Congressman Trey Gowdy's office in South Carolina voicing my concerns regarding FBI bias, after seeing his concerns about the same in the media. (Please recall Arias Morales stated she had a relative in the FBI and I have yet to receive the first call from them. There is also a lot of documentation over the years regarding illegal activities of the intel agencies.) I stated to Mr. Gowdy's staff that not only should partisan or biased FBI agents be removed from a particular case, but I feel removed from the FBI entirely. I gave my website link to them. There are very good agents in our law enforcement and intelligence, to be sure. However, those who would participate in a case while having biases that might affect their investigation, should not be in these types of jobs. The next day, 2.3.18, this past Saturday, I protested UM (Whistleblower related) and the need for reform of the CIA, FBI, and NSA with two signs on US 1 across from UM. (UM has a long and active CIA affiliation which frankly, after what I have been through, is no surprise.

The CIA is, however, per their mandate, not supposed to be operating in the US.) Concerningly, the Amtrak train that crashed early Sunday, that next morning (2.4.18), in South Carolina, was diverted to a side track after a railroad switch was locked in the wrong position, sending the train off the main line. That is being investigated. There was another empty train parked on the diverted path, causing the crash. A week or so prior, an Amtrak train carrying GOP lawmakers to their annual retreat in West Virginia hit a garbage truck outside Crozet, Va. People were killed in both accidents.

We should not have to have these types of concerns about retaliation, suspicious deaths, etc. (You have the list of some of the other concerning deaths and the City of Miami Police have even more information.) We have to increase our diligence and investigations to rule out malicious activity; like Herna said when he threatened my life, "you have to prove it" — and we have to be able to do that. These events I mention, if malicious, are a disgrace on our law enforcement and intelligence community — these types of malicious acts obviously entail surveillance and a lot of privileged data. That is why, among other reasons, we need reform of these agencies (there are multitudes of other verified examples of retaliation and "stirring things up" by these agencies). I will also note that concerning "theories" I one time would have paid no mind to, are seeming much more real. It appears to me that the people I have mentioned, who I believe have first-hand knowledge about my complaints, are likely all Democrats, including many at UM. (I am a registered Democrat.) Moreover, I do now believe that the multitude of concerning deaths of people who know the Clintons (over 100 it seems), for example, including Seth Rich, were indeed malicious, relatively easy to achieve in terms of getting someone "out of the picture", and vile attempts to void any potential threats against, and uphold power for, those in the Democratic party and their related ideals. Of course, I have reported UM many times and I am sure they take issue with that under some absurd rationality, and do seem to break the law with impunity, not only in my department, but I know this occurs in the hospital (UMH/University of Miami) Compliance department as well. Perhaps Markley was very upset the students were taken from her, although she did not appear upset when she told me. Perhaps Flamm was mad about the paper and possibly the fact that the students were taken away from Markley. I know they all communicated and that UM also knew I was on the MDC MPPRC. UM knows ACLU staff, and perhaps Markley/Flamm knew Borg personally or are even members of the ACLU themselves? This seems to be quite an active group that, over time, has taken it upon themselves to be the "people's judge, jury, and executioner". I think it is time those guilty of such crimes are arrested. There is much concern throughout the nation regarding these suspicious deaths, and that is warranted, and it is time someone took these concerns seriously and found links between contacts, emails, etc. The government knows who its trained killers are (for "sanctioned work"), and if involved in illegal acts need to be stopped and in prison. It would appear that many are using the cover of our legitimate organizations — FBI, CIA, FWS, ACLU, universities, etc. Clearly, this is not legal and such actions are indeed beyond unconstitutional. Again, I believe Flamm has much more information and am requesting further investigation.

Thank you again,
Judy Futerfas

Subject: Other concerns Fw: Thank you Fw: OIG FWS Flamm complaint written note and 6 pg att 10.31.17 via online

Hi Ronnie,

Sorry about this somewhat lengthy letter, but I have very serious concerns as you know, and some I had failed to mention to you. My concerns also, that I forgot to stress to you previously in light of the serious, more immediate issues, were of very high-level hacking of my home and work computer as well as of my personal "smart" phone and wireless home security camera. You perhaps recall reading about this in the emails to the City of Miami Police I had sent you (enclosed again here). Hacked emails have included those from Dr. Flamm. As a brief history in this regards, in 2011, after discussion with my professors, I had contacted Dr. Flamm via phone about submitting a paper from my boater data (the last time I had spoken with him was about 2003). In emails after that 2011 conversation, Dr. Flamm replied that he was not interested in doing a paper because there were two speed zones at the area of my research (which there had always

been). At some point thereafter, when the high-level hacking was extremely pervasive, I checked those emails and that email response regarding the two speed zones had been altered to show Dr. Flamm agreeing with my writing the paper. I did email my hacking concerns to overseeing organizations, including to UM IT, the State OIG/Attorneys, and the FBI (via their on-line link and email to Senator's Nelson and Rubio). I am glad to forward you any of those complaints. UM was supposedly looking into my UM IT complaints, but in my opinion, that was just to pacify me; it would appear they were allowing this to go on (if not actually perpetrating some/all of these crimes) -- they had much evidence and information available to them for tracking the perpetrators... Moreover, as I have also reported to numerous authorities, the very suspicious death of Joan Myers at Boynton Beach's Bethesda Hospital East, after my reporting UM to the Joint Commission, was time-lined in morbid, hacked emails addressed to me. (Joan was absolutely not at death's door and somehow also apparently developed the blood cancer myeloma while she was in the hospital. People live for years with myeloma.) My UM reporting included the threat to my life by Tumor Registry manager Stuart Herna as well as two younger women mentioned in my related retaliation complaints of deliberately rerouted printing and falsely started abstracting code renewal exam, both having developed cancer. I never received one call from the FBI although I did send them detailed information regarding my complaints. (As I have mentioned, a UM Tumor Registry supervisor, Susana Arias Morales, stated pointedly to me a few years ago that she had a relative in the FBI. One of the UM IT staff, Diane Rubin, had been very helpful to me regarding the hacking, missing emails, etc. After I reported her to the FBI as a contact who could give them more information, along with some of the hacking documentation, Rubin never communicated with me again.)

As was also mentioned in my emails to the City of Miami Police, I am still reporting complaints regarding UM. This includes the data manipulations in direct violation of Florida Law; illegal, hostile retaliation; their attorney who facilitated the firing, Aileen Ugalde; and concerning events including regarding specific people I have complained about. I am still receiving concerning emails as you are aware. I have no doubt that some of the people whose names I have previously mentioned as knowledgeable about this severe retaliation, know the source of this hacking (and of other related malicious acts). Dr. Flamm's acquaintance here when I first met him, Dr. Susan Markley, was also a UM graduate as well as Miami-Dade County DERM employee when I knew her (casually, from occasional meetings -- she told me after the Manatee Protection Plan Review Committee sunsetted [about 2010] that the students had been taken away from her). This retaliation against me has no doubt consumed a lot of time of several people at the least. These people are presumably on the time clock of some business and/or government entity, perpetrating this illegitimate and unconstitutional use of that money and/or taxpayer dollars. Again, I feel that Dr. Flamm has at least knowledge about this, if not direct involvement with perpetrating one or more of these acts I have mentioned. I am requesting that you please investigate these further illegal and extremely serious concerns including phone and email hacking. I have much documentation and will be glad to forward anything you request.

As I have also mentioned previously, I did not feel comfortable with the situation between Dr. Flamm and my major professor and felt there may have been some problem between them. I love to write and was looking forward to getting him his brief paper. Please recall that I had never heard from Dr. Flamm since about 2003 until I called him in 2011 (when he declined a paper due to two speed zones). I have also written that I felt that situation could have been handled better by everyone involved. I also offered to discuss any reasonable resolution. I did do a lot of work, above and beyond the degree requirement, and Dr. Flamm has all of this extensive data. I have expressed that I was glad to help out the State -- and am still paying back my school loan. I also stated that I did not know how Dr. Flamm came attend that Miami meeting (where I met him), and I do not know how well he knew Dr. Markley. I know them both casually from a few encounters; I do not know their politics, prejudices, philosophies on anything, view of the law, the US Constitution, etc. I mentioned that Dr. Markley had crossed out the MS [degree] on my desktop name-placard for the Miami-Dade County Manatee Protection Plan Review Committee. I had spoken with Jay Gorzelany at one of those meetings -- he knew Dr. Flamm and lived in that same (Tampa) area I believe. I hope the State appreciated my hard work. I was the person who began tape recording the boater observations -- Dr. Flamm initially said I had to stick with the two-person, student assisted verbal collection methodology. Unfortunately, these high school students would often not show up on the weekend and I had to figure out a way to enter the data on my own. After I showed Dr. Flamm what I was doing, this methodology (also using a transcription machine) was continued in other studies throughout the State. As you know, I supplied the State with over 12,000 boater entries including numerous categories within each, and a comprehensive phone survey of about 300 of these boaters on manatee related issues. I also submitted three reports to the State during this process as well as wrote a thesis (besides required classwork). I was told this extensive work was actually applicable

A rectangular stamp with the word "CONFIDENTIAL" in a bold, sans-serif font. The stamp is slightly tilted and has a textured, ink-like appearance.

towards a PhD, however, FIU did not offer this degree in my department at the time.

You had mentioned to me that you had not spoken with Dr. Flamm about my concerns (the hacking, suspicious deaths, my sighting of Dr. Flamm at Pinecrest Market, etc.). It would appear to me that he does know something about my concerns, at the least. No one is above the law, an especially important ethic for those charged with enforcing it and overseeing civil liberties, and/or having any kind of power over another. No one is beneath the law either. Respectfully, I think it is important that you find out from Dr. Flamm what, if anything, he knows regarding my concerns. I think it is not possible, in light of his "visit" to Miami, that he knows nothing. If he is indeed involved in or has knowledge of this horrid retaliation, he is operating outside the bounds of Our Constitution and laws. He should, in this case, not be working for the government or taxpayer funded agency, let alone in any law enforcement or teaching capacity. It may be that he should be in jail. That is no doubt the case for several UM employees. I am appreciative for Dr. Flamm's efforts in the environmental field and his assistance to me, but if my concerns regarding him are true, the rest does not matter.

Please recall also my concerns regarding the strange death of Snooty the Manatee in Bradenton, and the concerning death of a long-time family friend, Beatrice Van Welde, also in Bradenton. Her representative, Shirley (Ricky) Vermillion, had said Bea was found on the floor in the middle of the night, in the dark, yelling out, while her caretaker (nurse) at the home Bea was recently moved to said she fell off of her chair (next to her bed) while waiting to be brought to breakfast, about 8am. The nurse fully expected her to return to the facility (which she never did, dying in the hospital). Bea's brother Ed Sampson (South Carolina) had predeceased her in February 2017, which was unexpected. Although elderly, he was in good health, probably better than Bea, but had a heart attack at 95? HE was found on the floor about 6am in the morning ... Now his children are going after his part of Bea's will, although she had been estranged from them for years (Bea was not even mentioned in her brother's obituary, although the other brother was mentioned). I was down for a small part of her will, as were her closest friends in life -- but now the brother's heirs are contesting the whole thing ... Very concerning to me (the circumstances, regardless of whether I was in the will or not). ... As you know, my email and phone as well as other family member's email and phones have been hacked, and contacts and emails seen and maliciously used (as well as other types of hacking of my phone and emails home/work). There was also another concerning death on the day I first spoke with you, November 14, 2017.

Again, I hope you will look into this further. Please let me know of any other documentation or information you would like.

Thank you again.

Subject: Thank you Fw: OIG FWS Flamm complaint written note and 6 pg att 10.31.17 via online

Dear Ronnie (as you requested me to address you),

Thank you for your phone response last week. You had mentioned reaching me today and I just wanted to let you know that my phone (786-585-4769) had not been working for some reason today, but seems ok now. My other number, in case, is 305-674-1645.

I had made a few notes about our initial conversation, listed below.

- How I met Richard Flamm -- a meeting at the Miami-Dade County MAG group as I recall (Manatee Action Group) -- I believe he knew Susan Markley, a (now former) DERM employee. I do not know exactly how he came to know about and attend that meeting. I guess it was about 2001.
- Met with Flamm during a few subsequent visits for boat data collection (three times I am sure probably 2001-02), other than boat data/related conversation, nothing of substance discussed

INITIAL

CONFIDENTIAL

--I knew Flamm collected boat data, don't know much else about him

--I saw Flamm recently at the Pinecrest Market in Miami as I had written, he didn't say anything to me. I had not seen him since about 2002, during the boat data collection. Larry Schokman had a "heart attack" that same day, at lunch.

--The State didn't want to hear more of my complaints about UM cancer data manipulations, which, besides unethical, were also in direct violation of Florida Statutes, and referred me back to UM (which also didn't want to know about the manipulations). UM also denied the 2016 threat to me by manager Stuart Herna (because I had "complained about a lot of people", this threat also in violation of Florida law. Dr. Jennifer McCafferty, the UM Compliance Chair in 2012, was concerned about my and other UM employee complaints but was run off (in duress) of the UM Medical campus, went to UM Gables, and then left there. Her investigation of my complaints found "irregularities" and she was going to show me the report but then she was not allowed to. Besides the falsified follow-up, I have subsequently reported cancer cases deliberately left undone. (The State requires ALL cancer cases and treatments to be reported within 6 months.)

--Hacked emails time-lining Joan Myers' Boynton Beach/Bethesda Hospital East death in August 2016 after I had reported UM and Memorial Sloan Kettering Hospitals to the Joint Commission (re: threat to me and concerning cases of cancer in two younger female co-workers mentioned in my reporting) -- I have the source documents of those morbid, hacked emails. Her main nurse was "Amy", Officer Jeanniton (Boynton Beach) took my report about concern for her safety, but my attempts to follow-up have been to no avail. Joan was also illegally held in restraints. I know this because UM, earlier this year (2017), sent me, for the first time, a training on restraints, although I have no patient contact (dealing only with charts and the computer). More horrid harassment on the part of UM -- I do not know how much Flamm knows of this but I am positive he has some (or more) information on the horror that has transpired and that I have written you and the police about. (I will be glad to forward any other emails, documentation, etc.)

--I believe Flamm has **information about and/or involvement in** the horrific concerns as attached (you had read) including high-level hacking home/work phones, emails; suspicious deaths of people (as in my letter, not an inclusive listing); and/or the demise of Snooty the Bradenton beloved manatee (and concerning circumstances surrounding the death of Beatrice Van Welde from Bradenton), etc.

Also:

--On my renewal license for my Florida Driver's license, I had to retake my photo this year and had my Satao shirt on (and a lot of sunscreen--was going to the Zoo from there and didn't realize I had to renew my photo) -- It was very weird to me that not long thereafter, the beloved African elephant Satao II was killed ... That can be read on Google ... That may indeed be one of the strangest "coincidences" -- the elephant had been around for years -- but the timing of my many other serious concerns, I am sure, are not coincidences.

--As mentioned, the people I have mentioned (see att -- includes but NOT limited to: Flamm, Markley, Herna, Arias Morlaes, Jeff Borg [ACLU], Kristin Wipier [Democrats of South Dade], Rebecca Butler [artist/prior acquaintance], UM doctors/admin, etc.) would be able to tell you much more information, especially if they were scared of being charged as an accessory/accomplice. To the best of my knowledge, no one has cross-checked those people's work/home/cell phones and emails for communications.

Thank you again. You told me yesterday that you would update me, and that everything is confidential at this point.

Subject: Important information Fw: Complaint #2017-COM-0088

Please see more information in the note and email below. Thank you both again, Judy

When I was handing out the pocket Constitutions at the Miami Book Fair on 5th Street and 2nd Avenue (on the sidewalk) there was a white woman with dark, shoulder length hair, there on Sunday, 11.19.17, standing behind me near the pole by 5th St. She was there for quite a while, with a Smart phone in her hand. When I would look back she would stare at me with a scowl on her face. Sometimes she was looking at her phone. The City police officer was parked a few feet away and was inside the car. I do not think that she realized he was in there -- he could not be seen as it was very sunny and the windows dark. After a while, I guess this woman had been standing there an hour or more, the officer (who I had chatted with briefly Saturday and Sunday), got out of his car and went around to the other side (by the passenger door, probably lateral to her) and seemed to give her a "look", and she left almost immediately. She crossed 2nd Ave (going to the Bay) and seemed to stop on that other corner briefly. When I looked again for her, she was gone. I put my Smart phone around my neck and wished I had thought to take her photo. I didn't say anything to the officer about that at the time. Before I left I decided to mention that to him but there was a different officer there at closing.

I also spoke with FWS Ronnie Austin maybe an hour or so ago (today), and he is not going to investigate Flamm with the information he has. He said Flamm was not under investigation by the Police. I did not expect that that would be the case since Schokman was cremated and it seems his death was not deemed suspicious by those around him. I told Ronnie that most concerning, regarding what I KNEW, was the fact that Flamm was at the Pinecrest market, briefly, hours from home, not saying a word (discussed below) --- I hope Schokman's death was natural but the timing again, and cause

CONFIDENTIAL

of death, are concerning. I also reiterated to Ronnie (he asked that I call him by that name), that although I know UM (manager Stuart Herna) threatened me, among many other hostile acts, and did not like my reporting of their cancer data manipulations/cases deliberately left undone/nurse copying unique tumor board patient data from one patient to the next/falsification of follow-up, etc, as well as the State also showing disinterest, referring me back to UM -- I cannot say that Flamm has had no role (or a large role) in this retaliation. Also, the retaliation further increased AFTER the State OIG closed the UM investigation (saying they couldn't do anything against the employees because they were not State employees). There was a State plan to audit UM as well, but that was cancelled for reasons unknown to me. I reiterated to Ronnie that the MS (degree) was crossed out on my name plate at the Manatee Protection Plan Review Committee (MPPRC) in 2009, six years after I graduated from FIU. Susan Markley (DERM) did not do that on her own -- she wanted me on the Committee initially. However, at some point after I saw and spoke with Jay Gorzelany (from Tampa -- knows Flamm - Gorzelany was a speaker at a MPPRC meeting), the MS was crossed out on my name desk marker and Markley seemed to be going after me with digs/comments at the meetings. (See/hear this on tapes of the meetings.) Markley conveyed to me after the Committee had sunsetted that the students were taken away from her. I had asked her during the meetings if there were any problems and she denied this. Please recall that I also had voiced my concern at one of the meetings that many on the Committee could profit by some of our rulings. For example, we voted on issues related to boat docks and there were several owners of property along the Miami River on that Committee (who remained on the Committee and voted). This seemed to me in violation of the Committee ethics requirements.

Again, I have offered any reasonable compensation for not getting Flamm his brief paper. However, he did get the massive amounts of data I had collected (over 12,000 boater entries and several data items about each, recorded in real time) and then entered in Excel as well as the phone survey results of about 300 of these boaters. There were three reports submitted to the State and a thesis as well as my required classes. I conveyed to Ronnie that I hope the State is using this important data. Ronnie suggested that I could sue UM for the firing and retaliation, which I can. However, I told him that I think it is important, as a taxpayer, that someone working for the State be "above board" when it comes to matters such as this. Moreover, there should be no question as to Flamm's role, if any, in all of this. I have said that as far as I know, no one has cross-checked phone calls and emails of the people that I have mentioned, whom I know have information about and/or have participated in this vile retaliation. I told Ronnie that even the Florida Bar was trying to obfuscate UM Attorney Aileen Ugalde's role in facilitating this retaliation (a reason they gave for firing me was false); I never got one email or call back from her. The Bar is doing all it can to evade taking action on any of my complaints against Ugalde and other attorneys. (City Attorney Cherof never gave me the first call back re: Joan Myer's demise at Bethesda Hospital East. I was told there had been an investigation but no documents were provided via channels told to me.) So, there seems to be a massive cover-up regarding this hell, with agencies that could assist in getting to the bottom of this -- short of further tying up our over-burdened Court system, clearly the least efficient way to learn more about this -- refusing to help in the most basic of ways. UM deserves to be sued for the retaliatory firing, but that also does not necessarily help answer the questions I have detailed here and in other documentation.

Please see more concerning events below. My reporting, including this email, is NOT inclusive of all my concerns including for suspicious deaths.

Subject: Re: Complaint #2017-COM-0088

Thank you for your concern Ronnie. I do however feel that Dr. Flamm has knowledge (at least) of the severe hostility I have been subject to and my other concerns as written to you and other law enforcement. (Even the work/home phone/email hacking is illegal. There was much documentation presented to UM and law enforcement for that as well.) In actuality, it would probably be difficult for law enforcement alone to know if a death was "high-level" lethality --

CONFIDENTIAL

meant to be disguised as natural. Someone committing murder in this way would likely be aware of any cameras as well. Of course, if the body was cremated, as in the case of Mr. Schokman, even the medical examiner could make no further assessment. Joan Myers, deceased at Boynton Beach, Bethesda Hospital East, who I have previously mentioned, also apparently was cremated. There are, however, several other factors regarding Joan's death, beyond the morbid, hacked emails time-lining her demise, that point to homicide. Like the people who died of heat exposure at the Hollywood nursing home during Hurricane Irma, now ruled as murders, Joan was meant to live longer.

The fact that Dr. Flamm was at Pinecrest Market in Miami for the briefest amount of time, as I have described, (I am very sure it was him), hours away from his home, deliberately standing in my line of sight, not saying a word, is beyond suspicious and concerning behavior. I am quite sure an audit of email/phone contacts of those I have previously mentioned would show some patterns/connections. I have requested this of law enforcement several times. Did you or your office communicate with Dr. Flamm?

I am requesting as well that you please advise me if you learn of any other information regarding my complaints. No one is above the law or Our Constitution, (or beneath it), and such blatant defilement of our laws, here on our soil, is the highest of crimes, and, most dangerous to our republic. I will say that I have talked with people, while handing out the Constitutions, who seemingly feel the laws don't apply to them, that justice is slow and/or unfair, and hence, they feel justified in taking "justice" into their own hands. I have had related scenarios told to me, including the strong implication that in at least one instance, lethal, extrajudicial revenge had been taken against a defendant. In this case (conveyed to me at Pinecrest), this was in response to disagreement with a court judgement regarding the release of a person accused of murder. Clearly, some would argue that due process is the most important of our rights. There are innumerable legal findings, including judgements of guilt overturned, etc., that would support that stature. I know I do not need to elaborate to you how scary and unsafe society becomes -- for everyone, all ages, and in all walks and professions, when people act as though they are above the law, and that others are beneath it. Realizing more recently that Dr. Flamm might think differently is of extreme concern, especially in light of his work related to law enforcement, his authority over others, and in my case, contact with and authority over students. As I told you, I knew Dr. Flamm collected and analyzed boater, manatee, speed zone, and related data. I do not even know if he had law enforcement authority but imagine so. I do not know that he did anything else more controversial than that, and the idea didn't cross my mind at the time. You may be aware of my fairly recent website that warns of the dangers of the rise of the "military-industrial complex" versus our liberty, as stated by President Eisenhower. Today it is likely that President Eisenhower would have added the term "technological" to that "complex". There is also increasing concern that intelligence related agencies are infused in our colleges, in some cases covertly. This is all the more concerning because of the, at a minimum, questionable, but often illegal, practices of these agencies. I, I am sure, along with Eisenhower and many others, would not and do not agree with the level and type of intelligence related efforts in academia (and elsewhere). I am a firm believer in the full rights and humanity Our Constitution conveys and strives for. A strong military is different than concerns for an evolving police state.

I was speaking briefly with another person at Pinecrest while handing out the Constitutions on April 2, 2017. I mentioned my concern that Justice Scalia's death was not natural. This person immediately responded, "Maybe the same thing will happen to Clarence Thomas. He's big and fat also." She then got a phone call and walked away. I don't think I ever saw her before or since that incident (same as with Flamm--I last saw him probably in 2002, regarding the boat data collection). I did report her comment on April 11, 2017 via phone (786-585-4769) about 11:15am to the Secret Service (Miami) who referred me to police at the US Supreme Court, whom I also called shortly thereafter. When I reported this to police at the Supreme Court offices, the woman who answered the phone then asked me, "Did [the person I was speaking with at Pinecrest] say [Scalia] died of a heart attack?" ... I said "no" and repeated what the person had said to me (quoted above). Quite the strange response from her any way you look at it ... I called the Supreme Court Police back right after that call and requested and spoke with a police supervisor (a male). I repeated my concerns about the Pinecrest conversation, also mentioning the woman's response in the initial phone call to that office immediately prior. After this complaint of mine there were further very concerning events, soon thereafter, that I have notated elsewhere. Please recall that UM Tumor Registry Manager Stuart Herna threatened my life, stating that I had, "complained about a lot of people".

I will also add that subsequent to my reporting to you, my parents, on 11.21.17, received a very concerning phone call

from a number in Philadelphia, 215-523-6756. Also alarming is the fact that on an online search, this number appears to be inactive. On calling it numerous times, it has rung as busy. Details have been reported to authorities. I am glad to give you further information should you request it -- that timing is more than curious as well.

Thank you again. I hope you reconsider further investigating my concerns. I am greatly appreciative of your interest and time.

Judith Futerfas

Subject: Complaint #2017-COM-0088

Judith,

Thank you for bringing your concerns to the Office of Inspector General (OIG) regarding Richard Flamm.

After a thorough review of the information you provided, and speaking with you, and Detective Cabrera of the Miami Police Department, there is no predicate for further action by the OIG.

This complaint is closed.

Major Ronnie Austin, CIGI
Director of Internal Investigations
Office of Inspector General
Florida Fish and Wildlife Conservation Commission
620 S. Meridian Street | Tallahassee, FL 32301
Office: 850.488.6068

Judith Futerfas - UM employee for about 12 years – Senior Tumor Registrar
PO Box 83-1333
Miami, FL 33283
786-585-4769

 CONFIDENTIAL

University of Miami (UM) Tumor Registry
1400 NW 10th Ave Suite 604
Miami, FL 33136
305-243-5124
Manager Stuart Herna 305-243-4196

Please note: UM has several facilities. The complaints I have made are all regarding UM's:
Sylvester Comprehensive Cancer Center
1475 NW 12th Avenue Miami, FL 33136
305-243-5302

Documents re: Whistleblower Protection for retaliatory firing

- Retaliatory firing by the University of Miami in direct violation of Florida Statute 448.102 for reporting cancer data manipulations in direct violation of Florida Statute 385.202 and for reporting manager Stuart Herna's threat to my life in direct violation of Florida Statute 448.045.

Our State overseeing Tumor Registry, the Florida Cancer Data System (FCDS), is managed by UM and is located at UM's Medical Campus. UM hires and fires those employees. Manager Herna's wife, Megsys, is a high-level data manager at FCDS. Hence, UM oversees its own data and I did not feel comfortable voicing my concerns with FCDS. The State is not interested in making FCDS a stand-alone facility, which I had suggested to them. FCDS is largely funded with grants from the Centers for Disease Control (CDC). The National Program for Cancer Registries (NPCR) and American Cancer Society (ACS) help manage the National Cancer Data Base (NCDB), where this cancer data is housed. UM also receives millions in federal dollars otherwise.

Brief overview:

I have made numerous complaints to authorities over the years regarding cancer data manipulations I was either told to do, told about by someone else, or discovered myself. I refused to take part in any practices other than as mandated per our credentialing guidelines. Our credential is the Certified Tumor Registrar (CTR), which I earned by exam in 2009. More recent complaints include cancer data manipulation and severe retaliation reported (to the DOJ) days before I was threatened last year (2016). I also reported again to the DOJ and other overseeing organizations days before I was fired (6.12.17). Moreover, this firing was within two weeks of my responding truthfully to a good evaluation that I signed off on dated 5.31.17 (for 2016) and a \$10,000 raise. My evaluation response, submitted to UM HR, UM Equity/Compliance, and Manager Herna, detailed the threat to my life, by Mr. Herna, because I had (his words), "complained about a lot of people". I have also specifically been told by Mr. Herna in the past that, at UM, "we do not mention people's names" (exactly this phrase or very similar). The evaluation response also included excerpts from my Joint Commission complaint regarding that threat as well as my complaints of cancer data manipulations, both actions in direct violation of State law. All of these documents as well as many others are enclosed. The seeming substantive reason UM gave for the firing, that I hadn't attended a meeting, was proved false by emails (enclosed) stating

that the meeting was recommended, not mandatory. Recently hired UM President Frenk had also been notified of Mr. Herna's threat and the cancer data manipulations last year (letters enclosed). Many of these complaints have more documents associated with them should you want more information. There is much more information available than I have enclosed here; my reporting in this complaint is not inclusive of all my reporting or documentation, including of cancer data manipulations and retaliation.

Contents:

- Complaints (not inclusive) dated through the threat to my life by Manager Stuart Herna (on 2.19.2016)
 - 1 - 4.24.12 OIG Complaint (Met with UM's Dr. Jennifer McCafferty and two associates regarding this)
 - 2 - 12.31.12 Complaint to UM Compliance Dr. Jennifer McCafferty (She told me her report on my complaints stated they found "irregularities". She was going to give me a copy but it was then deemed private. Dr. McCafferty left the Medical campus in duress [per conversation with her, she had many concerns regarding what she saw at UM in general]. She went to the UM Gables Campus but left there not too long afterwards.)
 - 3 - 4.8.14 Complaint to Manager Herna re: Nicola Jones' abstracting noncompliance
 - 4 - 9.16.14 Complaint cases and letter to OIG, Inspector Pacchioli (I have more documentation on other cases I saw after this submission, that I did not send in -- the State OIG closed this case shortly after this, saying that UM employees were not State employees. They referred me back to UM [Compliance/Ms. Malagon] for further complaints. I voiced my concern to the OIG about reporting to UM, but I was not given any other option. I did spend about 2.5 hours showing Ms. Malagon some of the documentation [emails with her below].)
 - 5 - 10.14, 15.14 OIG plan to audit UM (this was cancelled, no reason given)
 - 6 - 4.10.15 FDLE data reporting timeline/info
 - 7 - 5.14.15 Complaint to Blanca Malagon recap meeting I had with her the day prior for about 2.5 hours in letter; outline of reporting; notes include Marla Swaye's follow-up falsification complaint and the 23 pages she gave me before leaving UM; email from Herna regarding a falsified follow-up by supervisor Arias (Susanna Arias Morales) that I had complained about to Compliance (Dr. McCafferty) in 2012
 - 8 - 5.20.15 Complaint to Blanca Malagon detailed letter of complaint history; emails GI Tumor Board sign-in had been altered to show a doctor had attended; the sign-in documents provided to me showed he had not signed-off
 - 9 - 5.22.15 Complaint to Blanca Malagon late/missing tumor board reporting
 - 10 - 5.25.15 Complaint to Blanca Malagon deliberate, malicious rerouted printing, unauthorized computer access
 - 11 - 7.4.15 Complaint to UM IT deliberately rerouted printing
 - 12 - 7.10-13.15 Complaint FCDS abstractor code renewal exam falsely, maliciously started by unknown person; missing emails
 - 13 - 7.27.15 Complaint HHS Office for Civil Rights 10356729

Page 3/4 Futerfas

14 - 9.30.15 Complaint to Jessica Pacheco (UM Equity) numerous things: disparate salary, money stolen, nurse's late/copied tumor board reporting, summary of data complaints/complaints shown to Ms. Malagon

15 - 9.30-10.1.15 Complaints to OIG include note to Ms. Pacheco (14 above)

16 - 10.1.15 Complaint to Blanca Malagon nurse copying over tumor board notes for March and April 2015 with the actual sent documents attached to that email; explanatory letter. (I can forward the actual document copies if requested via secure line.)

17 - 10.8.15 Complaint Florida DOH Board of Nursing - I complained about a nurse copying over tumor board data I was taken off that assignment by manager Herna in retaliation

18 - 12.11.15 Complaint UM IT multiple reports/issues/hacking/security concerns -- much documentation provided to them (I have copies if you would like them). (Tim Ramsay is now at World Fuels. Jose Ruano last I knew was still at UM.)

19 - 2.7.16 Complaint to US Attorney

--- - 2.19.16 Date of THREAT by Manager Stuart Herna (Detailed in complaints below)

Complaints (not inclusive) dated after the threat to my life by manager Stuart Herna

20 - 4.18.16 Complaint to UM President Frenk; UM FMLA emails/denial notice

21 - 4.25.16 Police report City of Miami threat to me by Stuart Herna

22 - 5.9.16 Complaint Joint Commission Memorial Sloan Kettering Hospital (New York)

23 - 7.4.16 Complaint UM President Frenk

24 - 7.7, 11.16 Complaint to UM's Judd Goldberg

25 - 7.24.16 Complaint Joint Commission University of Miami Hospital and Clinics/Sylvester Cancer Center

26 - 7.24.16 Complaint OSHA

27 - 8.16.16 Complaint Joint Commission Bethesda Hospital (Palm Beach County)

28 - 8.16, 18.16 Complaints City of Miami Police, Boynton Beach Police (Forwarded to Palm Beach Mayor and State Attorney February 2017 and City of Miami Police 1.4.17)

29 - 1.12.17 Complaint to manager Herna cancer data very serious errors Monica Olivas

30 - 4.20.17 Notice of raise about \$10,000 (supposed salary survey adjustment)

31 - May 2017 Complaint to UM HR, Stuart Herna re: Monica Olivas being titled as credentialed (CTR/ Senior Tumor Registrar) by her friend and supervisor Susana Arias Morales but this is likely not true -- she is an extremely poor abstractor (see prior complaint at 30) and very likely would not have been able to pass the exam. Includes complaints of inequitable salary for me (not being paid for relevant experience, as others were)

32 - 5.31.17 Sign-off good evaluation with truthful several page evaluation response complaining of retaliation including threat to me by Stuart Herna for "complaining about a lot of people" regarding cancer data manipulation complaints, also refers to Joint Commission complaints

 CONFIDENTIAL

Futerfas 4/4

33 - Late May-6.1.17 Emails (*36) UM HR, Equity (Pacheco) showing the meeting I was stated to have missed as the reason I was fired (6.12.17) show the meeting was recommended, not mandatory. Also, again mentioning my salary inequity—not including my relevant experience although this is considered for others

34 - 6.2.17 Complaint to the DOJ including my evaluation response detailing threat by Herna, cancer data manipulations and other very serious concerns

35 - 6.8.17 UM complaints to Florida Bar (Pacheco is an attorney) – salary inequities, complaints of retaliation including threat for reporting cancer data manipulations

36 - 6.12.17 Termination (Based on a false allegation that I had missed a meeting – the meeting was not mandatory. (*33) See these emails regarding this meeting. Also vague, embellished complaints about my evaluation response.) See also my emails to UM Attorney Ugalde to no avail – I had not one response from her.

• 37 - 6.19.17 Termination Appeal

38 - 6.26.17 Termination Appeal Denial

Thank you. Please contact me with any questions. I have had numerous problems with mail, including regular, UPS, and FedEx, being purloined, opened, “delayed”, etc. I have made a scan of this complaint and am happy to forward that as well. It is too large to submit via your online form. I have marked each of the 39 items above with a small label on the initial page of that section, top right.
