API Q2 ESSENTIALS & TECHNICAL APPLICATION FOR LEAD AUDITOR - 5 Days

Program Overview

This course provides participants with an in-depth understanding, knowledge, and skills needed to carry out successful internal and external API Q2 audits. The latest methodologies, practices, and techniques are utilized including practical application for the upstream service sector and their global supply chain that supports the petroleum and natural gas industry.

This course utilizes the latest training methodologies and uses a combination of lecture, examination, and group auditing to ensure each participant is able to analyze properly, audit, document, and report findings, concerns, and observations. This course covers all of the technical requirements outline in the specification. This course is the first in the industry that includes conducting a full API Q2 audit against a fully documented QMS and records management system, to include all well site planning and execution records. Throughout the audit, participants undergo observations and receive competency assessments by Accredited Providers and Subject Matter Experts. Participants that complete this course will receive a unique tracking and certification number and the designation of Q2 Lead Auditor along with an unique registration number issued by WPAG.

Summary of Course Curriculum

- API Q2 Specification Body of Knowledge
- Service Quality Plans
- Risk Assessment & Management
- Auditing the upstream service sector and the global supply
- Audit preparation, performance, reporting, and follow-up
- Conducting a full audit on Section 4.0, 5.0 and 6.0 of the Specification
- Auditing an SQP from inception through execution and how it ties in all of the API Q2 elements
- Auditor competencies, responsibilities, and accountabilities

Who Should Attend

Operators, manufacturers, industry suppliers, 3rd party auditors, and consultants who support the upstream service sector and their supporting global supply chain. This program is designed for quality, HSE, and operational personnel. This course is utilized by the international, national and state owned oil companies for both training and to obtain a baseline competency assessment by an accredited provider.

Course Materials & Credentials

1. Participants in attendance of this course will receive the API Q2 Essentials & API Q2 Technical Application for Lead Auditor Participant Workbooks.
2. Upon completion, participants will receive the professional leather bound credentials with a unique registration number and be listed in the Industry Registered Professional Network™
3. Participants that successfully complete the course requirements, will be awarded 4.0 accredited CEUs.
4. This program is recognized in all six regions and the CEUs are accepted by universities who recognize the IACET accreditation.

Unique Identification & Traceability Number

Upon successful completion, participants will receive a unique Registered Professional Number (RPN). The RPN is used for identification and traceability which is audited by accreditation bodies to ensure that each person taking the program has successfully completed all of the course requirements and has been assessed during the practical application by competent and qualified instructors.

Our Commitment

WPAG is an IACET Accreditation Provider (AP) for industry training. In 2016, WPAG was selected by the IACET Award Committee as the winner of the “Exemplar Training Organization Award, IACET's most prestigious award. This award honors exemplary, results-oriented programs that have demonstrated significant and relevant impact on the populations and industries served. WPAG's decision to become accredited to IACET was to ensure participants receive the highest level of training available in the industry.

Instructor Biography

Bryan Wollam

Bryan Wollam is the founder and CEO of WPAG. He has three college degrees and holds industry recognized certifications in the areas of business management, quality, occupational health and safety, environmental, reliability and risk management. His education and credentials are backed by more than 20 years of industry and management experience. He has served in leadership positions for Halliburton and Weatherford and has worked closely with the International, National and State Owned Oil companies, service providers, API, COS and BESSE over his career. He is an industry expert sought out by operators and service providers around the world to help with solutions to some of the industry's toughest challenges.

Keith Utter

Keith Utter is an API Lead Auditor and Master Instructor for API and WPAG. He is a graduate of the University of Phoenix and hold industry recognized certification in the areas of auditing, API Q2, API Q1, API Monogram and HSE. He has audited API specification around the globe and has extensive implementation experience. His education and credentials are backed by more than a decade of industry experience.

Graeme Gillespie

Graeme Gillespie is a Petroleum Advisor with WPAG, his experience in the oil and gas industry spans over 27 years. Working within the upstream sector, primarily in drilling services, he has gained knowledge and understanding in a broad range of disciplines and activities. At the rig-site, Graeme supervised, coordinated and mentored his colleagues in the use of established and newly developed service equipment. In managerial positions, he experienced contract negotiation, administration, and maintenance with clients and suppliers. In the workplace, he is accustomed to directing staff under his responsibility, in line with the company's goals as well as managing their individual demands. Lastly, his career has focused on seeking to mitigate operational risks faced by the industry through the introduction of robust and effective quality assurance systems.
