## BOX SEALING TAPES

Adequate packaging of goods for distribution and preservation is critical. A package that fails to protect its contents against damage causes much waste in corporate processes as well as increasing municipal solid waste disposal as the goods must be thrown away. Good quality box sealing tape offers consistent packaging performance, cost effectiveness and clean efficient looking packages.

## BOX SEALING TAPE

- Quality acrylic adhesive tape provides consistent performance
- Designed to resist center seam splitting
- Fits on most industrial tape guns
- Elongation at break: 130%
- Colour: Clear

## DESICCANTS

**Moisture control:** The desiccant absorbs moisture vapour through the capillary action of the absorbent particles. Neither the particles, nor the bag that contains the particles, is changed physically by the absorption action. As well, the container does not become saturated, therefore it doesn't soften or liquefy during use. And metal parts touching the bag will not corrode.

**Dust-free:** Tyvek bags are ideal for applications where dust must be kept to a minimum. Examples include computer components, packaged chemicals, and photographic and optical devices.

## ROPES

### A. POLYPROPYLENE

Polypropylene makes a flexible and lightweight rope. It is rot proof, resists oil, water, gasoline and most chemicals. It is the only rope fibre that floats. Available twisted or braided. This fibre is a perfect economical choice as a general purpose rope.

### B. NYLON

Nylon is known for its elasticity and tremendous shock absorbing properties. It has good abrasion resistance, is rot proof, resists oil, gasoline, and most chemicals. It has good resistance to UV (ultraviolet) rays. Nylon will last 4-5 times longer than natural fibres.

Model No.	Description	Length'	Colour	Min. Tensile Strength lbs.	Wt. lbs.	Price /Each
PF224	1/2" Nylon Double Braid	300	White	8200	20	217.00

### C. MANILA

Manila rope was once the preferred choice in ropes before the synthetic fibres were developed. Manila rope still maintains some advantages to synthetic fibres. It is not affected by heat, and has an excellent resistance to the sun's UV rays.

Model No.	Description	Length'	Colour	Min. Tensile Strength lbs.	Wt. lbs.	Price /Each
PF225	1/2" C# Manila, 3 Strand	100	Natural Brown	2650	7	50.20

### D. SISAL

Sisal fibres come from the Agave and Sisalana plants grown in some tropical countries. Sisal has many of the characteristics of manila, but offers only 80% of its strength. It is more economical than manila, and makes a good choice as a general purpose rope. It is commonly used as a tying twine.

Model No.	Description	Length'	Colour	Min. Tensile Strength lbs.	Wt. lbs.	Price /Each
PA831	Sisal Twine 3 Ply	850	Natural Beige	300	5	31.00

### E. COTTON

Cotton is a very short staple fibre, naturally beige in colour. It is a soft fibre, which makes it nice to handle. It also knots very well.
