

ARGAN offers a full range of natural and synthetic powders to improve the texture, appearance and performance of cosmetic and personal care products.

In pressed powder formulations, their micronized stearate and myristate salts offer enhanced performance as dry binders, minimizing the need for added oils, thus reducing glazing, improving product pick up and enhancing application/pay off properties. In emulsions and anhydrous formulations, these products help improve product stability by increasing the viscosity of the lipid phase, thus minimizing syneresis.

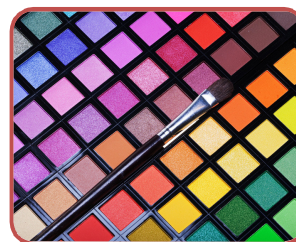

- Excellent dry binding capability
- Rheological modification
- Filler
- Improve wear
- Texture enhancement
- Enhanced slip / lubricity
- Opacifier

AVAILABLE GRADES

PRODUCT	COMPOSITION (INCI)
PALMSTAR ZNST-325	Zinc Stearate
PALMSTAR ZNST-325 M	Zinc Stearate
PALMSTAR ZNST-325 USP	Zinc Stearate
ARG-MGMY	Magnesium Myristate
ARG-ZNMY	Zinc Myristate

APPLICATIONS

- Anhydrous makeup
- Mascara
- Lipsticks
- Liquid makeup/foundations
- Pressed powders
- Emulsions
- Gels
