

Ageless products homecare advice

The **Ageless** products you have been recommended are active products and are designed to work at a cellular level to correct, prevent and nourish the skin. For this reason you may notice some changes in your skin as you become accustomed to this new level of skincare.

All of the following are considered normal and may last for the first couple of weeks of usage:

- ✓ **Tingling on application of product**
- ✓ **Skin tightness or feeling of dryness**
- ✓ **Mild shedding**
- ✓ **Mild irritation**

This is a positive sign as it indicates the products are creating changes within the skin. These changes are all due to the main ingredient in your **Ageless** products, Glycolic Acid and Vitamin A.

Glycolic works by absorbing into the skin pushing dead lifeless cells towards and off the surface. As we age our skins natural exfoliation process slows down so glycolic acid is considered a must to keep your skins cell regeneration cycle moving. Glycolic acid exfoliates the skin, increases cell turnover, hydrates and resurfaces the skin.

Vitamin A is deemed the holy grail in antiaging and necessary to maintain optimum skin health.

Once you have used the products for a few weeks it will have reduced any buildup of dead cells revealing glowing youthful skin. These products are given before and during your course of Image peels to deeply exfoliate and regenerate the skin. This allows your peel to penetrate the skin effectively giving optimum anti-aging results.

To allow your skin to become accustomed to this ingredient it is important that you start introducing any of the below products slowly.

- **Total facial cleanser**
- **Total anti-aging serum**
- **Total repair cream**
- **Total eye lift cream**

Age later

Gradually introduce the product to the skin to allow acclimatisation. Where your skin specialist has recommended more than one of these products you will use the products together on the nights listed above.

Week 1: Use x2 a week e.g. Monday & Thursday

Week2: Use x3 a week e.g. Monday, Wednesday & Thursday

Week 3: Use x 4 times a week

Gradually build to x7 a week under your therapists guidance.
