Construction Careers

CAM-CORE

To address the widening gap between demand and qualified individuals, The Construction Association of Michigan has developed our CORE program. CORE stands for **C**onstruction - **O**pportunities - **R**esources - **E**ducation. This website is a terrific resource connecting you to information about starting or advancing your career in construction.

Enrolling in an apprenticeship through a union generally requires a high school diploma or GED, 18 years of age, and a valid driver's license. While earning your Journeyman status, you can be paid to attend school and work! The market for building trades is heating up and Michigan does not have enough workers to fill the available positions. Click the links below to learn more about skilled trades.
