1. $4.8 + 0.3 =$ _____

2. $2.4 + 5.7 =$ _____

3. $0.08 + 0.04 =$ _____

4. $0.98 + 1.03 =$ _____

5. $3.26 + 6.95 =$ _____

6. $4.97 + 1.06 =$ _____

7. $4.07 + 1.34 =$ _____

8. $6.13 + 2.98 =$ _____

REMEMBER

Use the Read–Draw–Write process to solve the problem.

9. Julie has $17\frac{2}{5}$ quarts of paint. She uses $9\frac{2}{3}$ quarts of paint on a banner. How many quarts of paint does she have left over?

10. Use >, =, or < to compare the expressions. Explain how you can compare the expressions without evaluating them.

$$\left(9 \div \frac{1}{4}\right) + (7 - 2) \underline{\hspace{1cm}} (7 - 2) + \left(\frac{1}{4} \div 9\right)$$
