Tip of the Month:

How to make digital manipulatives in Google Slides.

Watch this quick video:

1. First create or select an image from the web that you want to use as the manipulative.
2. Copy the image.
3. Paste the image as many times as you need.
4. Select all of the images.
5. Click Arrange> Align> Center
6. Then Click Arrange> Align > Top
To move all of the manipulates into a certain area highlight from far corner to select all.
7. Students can drag manipulatives.
