SUMMARY: All animals not on domestic or unrestricted, including those that are on the exception list require a possession and/or import permit which are only for educational or scientific purposes = BAN. Fish, native and exotic, are classified as prohibited, restricted or unrestricted. Prohibited require a special Prohibited Species Permit (not for pets), restricted do not require such permit but other laws must be followed like fish import, and unrestricted do not require a permit. All unrestricted fish must normally be found between 30 North latitude and 30 South Latitude, which is from Florida, almost top of Africa and India and above SE Asia down to nearly the bottom of Brazil and Africa and 2/3 of Australia. In other words, they must be from warmer climates.

VERMONT LEGAL PET GUIDE

POSSESS		IMPORT			TAKE	COMMENTS
Legal as Pets	VFWD Permit	Legal for Pets	VFWD Permit	Ag Permit	Legal for Pets	
						This is only a guide of animals that <u>MAY</u> be legal in a state. Due to the extensive amount of laws involved that are constantly changing, UAPPEAL cannot guarantee the accuracy of the information. Users are responsible for checking all laws BEFORE getting an animal.

DISCLAIMERS:

- * The laws listed above lists whether a species to legal to possess and import according to state laws and then any federally protected species with stricter regulations than the state. Be sure to review all federal laws as some ban certain species as pets or make it legal to possess a species but bans their interstate import in commerce or purchasing across state lines (you can still move with your animals across state lines).
- *For states that do allow keeping wild-caught native species as pets, it is usually limited to game birds, game animals, furbearers, reptiles, amphibians and invertebrates. Such taking usually requires some type of hunting or fishing license in addition to any required captive wildlife permits. All laws must be followed, including daily bag and possession limits, seasons, size limits and location specific regulations.
- * These guides are usually based on state fish & game laws, state agriculture and health import laws, and marine resource laws except when otherwise noted. Check laws for all requirements. Additional state laws may apply, including general animal control and care, livestock, and other health laws.
- * Species lists vary on each state page depending on each state's law. While we try to include as many native vertebrate species as possible, we cannot guarantee that all species are covered above.
