## Family and friends, working together to create a masterpiece!

Art Totality dedicates its' services to finding affordable art related events to help build and strengthen community, despite our current economic condition. Family/Friend tickets are cheaper than individual or couple tickets... this is why: we want the entire family or groups of friends to work together.

We call our approach to art projects "team building art". Families and friends work as teams to complete one project. These completed projects can range anywhere from a completed pizza to a sculpted tree. Art Totality is about including all of the arts, all family/friends and all communities.

Art Totality takes specific steps to assure that we will have fun!

In many cases Art Totality will suggest an activity after the featured event. The purpose of this suggested event is to offer an additional outlet for children, parents and friends to interact with other families, friends and artists in the community.

The superstars of our events are the featured artists. Our featured artists will showcase their work and help lead the group in an activity. By featuring artists we bring the community to art, art to the community and artist to artist. Many of our featured artists will have their products for sale after the event. We encourage those in attendance to take advantage of the great opportunity to get to know the artist behind the work.
