

ROHS COMPLIANCE LETTER

June 30, 2006

Nationwide Circuits, Inc offers printed circuit boards compliant with the EU Directive 2002/95/EC on the restriction of the use of certain hazardous substances (RoHS) in electrical and electronic equipment. (*Provided that a lead free surface finish is requested*).

Article 4 of the Directive reads:

*Member States shall ensure that, from 1 July 2006, new electrical and electronic equipment put on the market does not contain **lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE)**. National measures restricting or prohibiting the use of these substances in electrical or electronic equipment which were adopted in line with Community legislation before the adoption of the Directive may be maintained until July 2006.*

This letter certifies that all of our printed circuit boards, (with a surface finish other than tin-lead HASL) comply with the RoHS directive. We have certification statements/declarations from our suppliers, which state that none of the restricted items listed above are contained in any of our raw materials.

Sincerely,

A handwritten signature in blue ink that reads "BRETT AUSTIN". The signature is written in a cursive, slightly slanted style.

Brett Austin
Executive Vice President
Nationwide Circuits, Inc
