

**** Special Needs ****

MEET GEORGE

He is an 11 year old male purebred dachshund who has diabetes and needs to have insulin shots twice a day, but through a diet change his foster mom has been able to get his insulin down to only once per day with the hope of eventually being able to do away with it.

He is dog door trained, extremely lovable and always wants to cuddle.

He's a beautiful senior with a special soul looking for a loving home and family he can call his own.
