

# GREAT PYRAMID PATTERN AT SINAI

This study proposes that Mt. Sinai is actually a mirror of the Great Pyramid of Giza. Or more accurately the Great Pyramid is modeled after the one in Heaven as it is with the purported real Mt. Sinai in Arabia. Mt. Sinai does appear to correspond to the Great Pyramid when the dimensions, angles and attributes of the Great Pyramid like the King's Chamber and the Subterranean Chamber are transposed to the Mt. Sinai core complex.

**NOTE: Schematic cross-section of Great Pyramid, front view overlaid with top view of Mt. Sinai and reversed.**

Given that the phi ratio perhaps is a key to the whole mountain complex, this study proposes that Mt. Sinai is in actuality a mirror of the Great Pyramid, or more accurately the Great Pyramid is modeled after the one in Heaven as it is with the purported real Mt. Sinai in Arabia.

When one transposes a schematic of the Great Pyramid and reverse the dimensions, angles and attributes like the King's Chamber and the Subterranean Chamber to Mt. Sinai, you get a perfect match. This matching corresponds to the key location being examined at this purported Mt. Sinai location in Arabia.

The following distances determined by GPS coordinates are itemized below. These locations are based from firsthand eye-witness to each site. Note that some measurements are an approximation to these locations and suggestive in the prophetic scope for this study as some actual points topographically maybe impossible to determine.
