

Correctness

Guess the words defined by clues. The answers vary in length from three to fourteen letters long and of these, three are capitalized. Just make sure you enter all of them correctly!

Enter the answers in the grid one after the other starting in the top left corner and in the same order as the clues. Across words that don't end at the rightmost square of the row will continue on leftmost square of the next row. Similarly, down words that do not end in the bottom square will continue at the top of the next column.

Eleven across words and ten down words won't fit into the grid unless one of their letters is removed. These twenty one letters taken in order as they appear in the across and then the down answers will spell out a relevant and pithy phrase.
