## CHARACTERISTICS OF FAUX WOOD BLINDS

Faux wood blinds are an excellent and economical alternative to wood blinds for many applications and offer long lasting performance. The Whites and Neutrals and the Wood Tones colors are constructed of a durable engineered polymer material, and the Premium Grain colors are constructed of a non-PVC acrylic-based material. Both materials will not crack, chip or fade – perfect for high traffic areas. They are also easy to clean and are moisture resistant for placement in kitchens and bathrooms.

Faux wood blinds are not intended for installation near heat sources such as radiators and heat registers which can potentially compromise the integrity of the faux wood material, or in locations where temperatures within the window casing will exceed 120 degrees Fahrenheit, including older single pane or aluminum frame windows that conduct and amplify outside heat into the window casing.

Faux wood blinds in all colors are certified GOLD for Greenguard Indoor Air Quality. The Whites and Neutrals colors and the Wood Tone colors are FR Certified NFPA 701 (Premium Grain colors are not FR certified).

# SOLID AND DECORATIVE TAPES

## TAPES

## TAPE SPECIFICATIONS

Select the tape width, color and design which will complement your 2" or 2-1/2" faux wood blind.

- Made from a poly/cotton blend
- Resists fading or shrinking
- *Lifetime Guarantee*
- Decorative tapes are attached to solid colored tape ladders that are slightly narrower than the width of the decorative tape (see chart below). The ladder is pre-selected based upon this width and for color coordination. A high tech gluing process is used to adhere the decorative tape. This process is superior to the commonly used sewing application which is visible and tends to pucker. **The decorative tape is only applied to the ladder on the front of the blind. The back of the blind will have a solid color tape visible (see chart below).**

FOOTNOTES (FEATURES & SPECIFICATIONS)
<sup>1</sup> RemoteTilt motorization system requires a hand-held REMOTE CONTROL unit. <b>The quantity of remote control units must be specified when ordering. RemoteTilt requires both a remote and a power source. Please specify when ordering.</b>
<sup>2</sup> <b>The LightsOut configuration</b> may cause slight "puckering" of the lift cords on the front of the blind when the slats are tilted backwards (reverse tilt) due to the use of interlacing cords on the front (the back uses looped ladders). A gentle tug down on the lift cord tassel will eliminate any puckering.
<sup>2</sup> The slats on LightsOut routeless blinds feature notches in the slat instead of route holes. Regardless of blind size, there will notches in the front and rear of the slat on the far right and far left ladders only, approximately 6" in from the end of the slat.
<sup>3</sup> There will be a 1/2" maximum light gap between multiple blinds on 1 headrail. 2 or 3 on 1 headrail not available with the RemoteTilt upgrades.
<sup>4</sup> Wood tone blinds will include Antique Brass tape clamps and White/Neutral tone blinds will include White tape clamps on the bottomrail.
<sup>5</sup> When ordered with T901 Textured Pure White or T903 Textured Pearl, the Crescent Valance will be a smooth finish.
<sup>6</sup> On outside mount valances, the 1st set of ordered spacer blocks will automatically lengthen the default 3" valance return length by the depth of the spacer, either 3/8" or 3/4".

## REMOTETILT™ MOTORIZATION: OVERVIEW

---

With RemoteTilt motorized blinds, a better quality of life and have more time to enjoy life's daily pleasures. At the touch of a button, window coverings can be instantly adjusted to changing activities or the varying sun conditions.

An ideal solution is to manage glare with a RemoteTilt hand-held remote control. At the simple touch of a button, blinds will tilt open or closed to adjust to the changing sunlight in a room.

RemoteTilt motorized blinds provide ultra-quiet operation. This RF system can operate blinds from virtually anywhere in the house without direct line of sight. Similar to how a garage door opener operates, radio signals travel through walls and make it possible to control multiple coverings throughout the home alone or as a group. It is also available in a 5-channel version. The multi-channel RF system allows for independent control of individual blinds and/or group control.

---

The RemoteTilt motorization system provide many benefits, such as improving energy efficiency, providing easily controllable privacy and also enhancing home security.

---

The RemoteTilt RF timer allows users to program specific times of the day to automatically adjust blinds in different areas of the house, protecting interiors from the fading effects of direct sunlight. This feature provides added security to an unoccupied home by creating a lived in look even while homeowners are away on vacation.

The battery powered RemoteTilt RF wireless wall switch allows blinds to be controlled when entering or exiting a room, just like the lights. The switch may be seamlessly installed without wiring next to any light switch or stand alone, and is never misplaced. This one touch privacy helps create the ideal environment whether preparing for a bath, relaxing in bed or enjoying time with the family at home.
