OSCAR

smart vision safe navigation

SENTRY

Latest camera technology meets Artificial Intelligence to bring highly advanced object recognition to the bridges of motor vessels and yachts. Detect early. Identify reliably. Avoid safely.

Large and small, day and night.

OSCAR SENTRY

OSCAR Sentry brings a radical new approach to safety at sea, combining latest sensor technology with machine learning and artificial intelligence. OSCAR Sentry continuously scans the environment with a combination of daylight/lowlight and infrared cameras on a rotating unit that surveys 360 degrees. Detecting temperature differences as small as 0,05°C and identifying hazards based on the experience of millions of recognized marine

objects, and more than 300,000 nautical miles traveled at sea, OSCAR Sentry will reliably warn you before objects become a hazard.

OSCAR Sentry offers an intelligent alarm system for both collision avoidance and for approaching objects when at anchor, increasing safety in all conditions. By recognizing and tracking floating persons, OSCAR Sentry can support SAR efforts and MOB recovery.

VISION & PROCESSING UNIT Thermal Cameras Flir Boson 640 x 512 25° HFOV, 14 mm Flir Boson 640 x 512 8° HFOV, 55 mm

OFFSHORE ONE

WATCHKEEPER

Al-based object recognition at sea for cruising yachts: Detect early. Identify reliably. Avoid safely. Large and small, day and night.

OSCAR OFFSHORE ONE

The revolutionary all in one design: OSCAR One 320 combines both the camera unit and the data processing in one compact, mast-mounted unit. Connect Oscar One 320 to the bus system of your yacht and take navigation to a new level of safety.

OFFSHORE 640

Al-based object recognition for offshore sailing and blue-water cruising: Detect early. Identify reliably. Avoid safely. Large and small, day and night.

OSCAR OFFSHORE 640

Superior safety for serious offshore sailors: The Offshore 640 boosts your detection range with high-resolution thermal cameras for maximum power, a low-light color camera for reliable imaging in the most difficult twilight conditions, and a powerful processing unit. Whatever is out there, with the Offshore 640 you will see it first.

COMPETITION 640

Al-based object recognition for offshore racing and radical performance yachts: Detect early. Identify reliably. Avoid safely.

Large and small, day and night.

OSCAR COMPETITION 640

Ultimate power for radical racing where every gram counts. With its lightweight design and 100° pan range, OSCAR COMPETITION 640 fits rotating masts. Its high-resolution thermal cameras extend the observation range for early detection.
