

Welcome,

For more than 30 years I have helped thousands of patients. So many praise me. I will try my best to help you.

As I want to focus on the patient, when you are telling me why you came to see me, I want to listen to you intently. I will write on the chart. Next, I will examine you. My nurse will help me while I examine you. After examination, I will make suggestions. My nurse will explain those suggestions to you.

If you do not agree with your suggestions please ask us questions. Speak up. We welcome your comments, questions, concerns, and disagreements.

My nurses will write instructions on a piece of paper. I will ask a couple of my nurses to go over the same thing with you. By the way, I will not shake hands with you when I first encounter you, as I do not want to give you cold as I see many sick patients.

If you do not agree with your treatment and you want to see another doctor I can make a suggestion.

Also, we will check on you periodically.

Please do not bring extra children to the appointment, If you bring extra children for some reason, we will reschedule your appointment.

Thank you,

Dr. Patel and Staff
