

N2Care's MEDCottage

Offering affordable and accessible health care for all ages.

Why should the MEDCottage receive Medicaid approval and subsidies for low-income citizens?

- Average cost per day is approximately **one-third** the national average per diem rate paid to nursing facilities for Medicaid recipients. (See chart.)
- Offers a less costly alternative for seniors and disabled citizens.
- Offers a less costly alternative for citizens of any age with a compromised immune system.
- Alternative to further burdening nursing facilities already strained by budget cuts, understaffing, and a growing population in need of care.
- Response to societal needs.
