

# ALTAR OF MOSES AT MT. SINAI

## THE ALTAR OF MOSES

According to the numerous eye-witnesses that have visited the purported Mt Sinai in Arabia, the mountain core complex had an altar at the foot of the mountain as described in Exodus. It was the Altar that Moses built at the base or foot of the mountain. It has an elongated 'V' shaped configured animal pen that had a slaughtering area to the north and an adjacent Altar. The 'V' shaped pen has some very unique geometry, numerical and angle attributes that will be delineated.

Speculated length from center fulcrum to end of pen from satellite imagery:  
12 Smoots  
24 Yards  
72 Feet

3) Estimated Altar dimensions from satellite imagery:  
35' x 35' or  
35 + 35 = 70 as in 70 Elders of Israel

4) 12 Columns adjacent to the Altar's Fulcrum:  
35' x 35' or  
35 + 35 = 70 as in 70 Elders of Israel  
Tribes of Israel  
Marble w/ Foundation

This purported Altar of Moses is in perfect harmony mathematically to the rest of the sites on the Mountain core complex, i.e. the Cave of Elijah, the other competing Altar to the Golden Calf and the Cleft of the Rock, etc. This Altar was also a clear foreshadowing of the required High Priestly office and how blood sacrifice is required for atonement before one can approach the 'Mountain of GOD' and enter a Covenant of 'promise' with the LORD for redemption to take place.
