Condor MV

Max View Flexible Impact Door

The Condor MV Max View Flexible impact door is constructed from an internal PVC body surrounded by vinyl outer layers on both sides. Ideal applications include food processing and industrial environments.

- ✓ Designed and manufactured to absorb heavy traffic and provide a maximum field of view
- ✓ Extra large clear PVC window for the utmost visibility and safety
- ✓ Bi-parting door panels have a 3" center overlap providing a temperature and noise barrier
- ✓ Jamb edge balloon seal, with top & bottom wiper gaskets, provide a superior seal that helps save money
- ✓ Top mounted gravity hinge permits door to open fully and close automatically by gravity
- ✓ No bottom hinge allows for maximum use of opening width
- ✓ Easy to clean
