## IN CASE YOU MISSED IT

**"China's ban on scrap imports a boon to US recycling plants"**

***Tribune - May 18, 20019***

***By Mary Esch***

The halt on China's imports of wastepaper and plastic that has disrupted U.S. recycling programs has also spurred investment in American plants that process recyclables.

Please [CLICK HERE](#) to read more.

Editor's Note! A BIG thank you to Joe Watje for sharing this article. While it will take time for the U.S. to gear up enough plants to solve the current recycling issue that has contributed greatly to recent cost increases in the solid waste industry - and therefore to the end user of the service - this may begin to provide a solid solution. If this trend continues, it definitely offers a ray of hope for the future of recycling, for landfills, solid waste collection and disposal costs, and rates paid by the end user.
