So, our regional AMPS show is on-track for next week, Friday and Saturday, 19-20 June at the Crane Creek Gymnasium on US321 North (Fairfield Road about 2 miles north of I-20, Exit 70). I know that this show hasn't received a lot of promotion, and our lead up to it has been pretty low-keyed. In this respect, this year's show may seem like a pretty casual affair. This is not the case, at all. I'd like to impress on each and every one of you that we will need all-hands on-deck to pull this show off.

As always, with an AMPS show, it will be the judging that will require the most effort and time, and the only way that we will get the judging done on time is for everyone to help out. Remember, there are no prerequisites or mandatory experience levels to judge. Every member of our chapter is a potential judge. I know that most of you already know this, but since our last show, we have gained a number of new members who may not. For many of you, though, this might be your first AMPS show, and AMPS shows are run quite a bit differently than other model shows you may be familiar with.

Jeff Nelson will be presenting the AMPS Field Judges' Certification training on Friday evening, starting around 5:30-6:00 pm. Although this training is NOT required, if you do attend, and then complete the required two mentored judging shifts, you will be acknowledged and recognized as a "Certified AMPS Judge." During our awards ceremony, you will be presented with the certified judge's pin, and your name will be entered into the national-level rolls of certified AMPS judges.

(BTW, most of our chapter's members are "Certified AMPS Judges," and we also have a large number of certified Table Captains and ACJs, so we have a tradition of excellence in this area. I highly encourage all of you who are not yet certified to take advantage of this opportunity! It's not only a great way to help out and give back to the society – and our club – but judging is also one of the best paths you can take as an individual to learn to become a better, more skilled modeler.)

We'll follow this training up with a few judging evolutions until we run out of time at the venue and have to shut down (9:00 pm). We'll start judging again on Saturday morning as soon as we can put together a team, and judging will continue until we're complete. Hopefully, we'll be done judging by 3-4:00 pm and can get the awards ceremony kicked off around 4:30-5:00 pm. If everyone pulls together, then we should be able to clean up and clear out of the venue by about 6:30-7:00 pm. In order for this to happen, though, it will take all of us working together.

There are also a lot of other show support jobs that will need doing, too, so if you get tired of judging, please don't just take off. Come see me or anyone else involved and pony-up to lend a hand with some other job. We'll need runners, Ram Rods, and folks working registration and the raffle. There's set-up, tear-down, and clean-up, too. In short, it really does take everyone in the club to put on a

successful show, and don't forget that everyone in the club voted to do this. We're all responsible for the outcome, and we all share in the results.

We've established a very good reputation nationally and regionally for our shows, and that's because we have a "can-do" membership who work together well. Here's to looking forward to yet another successful local show!

### Tentative 2016 AMPS International Convention Theme Logos

As all of you are aware, I'm sure, the theme for the 2016 convention is "World War I." This theme was selected during the Annual General Membership meeting at the 2015 convention just held in Auburn, IN.

Well, your 2016 Convention Committee has been hard at work over the last month putting together tentative logo designs to complement this theme, and last week, after reviewing over 20 logo designs, your committee selected these two:

Logo #1  
(most votes)

Logo #2  
(next most votes)

Proposed Show T-shirt

Proposed Crew T-shirt

**Theme Award Eligibility:** Any era or nationality. Actual or hypothetical. Scale is immaterial. Entry must be entirely wheeled, intended to run on roads and / or cross-country and must be armored. The armor may be factory designed or field expedient. The vehicle does not have to be fully armored or enclosed. Partial armor and open tops are eligible if all other requirements are also met. The wheeled armored vehicle may or may not be armed with weapons intended to be fired from under armor from within the vehicle or a turret. (I.e. armored but un-armed vehicles that meet all other requirements are eligible.) Vehicles bound only to rails are not eligible. However, armored vehicles that are primarily wheeled to run on roads or cross-country but which have supplementary rail wheels are eligible. Half-tracked vehicles are not eligible. Vehicles that are designed to run on "convertible" tracks or wheels are not eligible. Vehicles designed to run primarily on skies or skids are not eligible. The wheels of eligible armored vehicles do not have to have rubber tires. Composite or all-steel wheels, with or without spuds, pads, or other traction enhancing or ground pressure reducing devices satisfy the eligibility criteria for wheels. Eligible wheeled armored vehicles may be equipped with supplemental, removable tracks or chains intended to temporarily improve the traction of their wheeled drive systems. Any questions about eligibility will be decided by the Chief Judge whose decision will be final.

Once you do, you'll never go back!

### **"The Day Room"**

*In the US military, most company-level units have a "day room" in the barracks where the troops hang-out, relax, and BS. When you want to learn the latest in "rumor control," you swing by the day room and chat-up the Joes and Janes hanging out there. They might not always get it right, but they're always willing to tell ya just what they think! So, welcome to "the Day Room..."*

Well, gang, we're on the cusp of another local AMPS show, our fourth as a club.

I do hope that I haven't beat you all up too hard in this issue about coming to the show to help out. If I have, I apologize.

If anything, though, my emphasis on helping out next week is a direct reflection of my own anxiety and concern. In the past, I have seen firsthand how model shows can go downhill if the hosting club members don't pull together; what happens if folks aren't willing to put in the time working the show. I've also had a couple of recent experiences at other shows that have brought these concerns (fears?) up to the surface.

To be sure, we've never had that problem, and I do find comfort in that. We've always had good participation of our own club members at our shows (and others!), and for that I am grateful.

You guys have earned and deserve the great reputation that you have. Our shows have always been run to the highest standards, and that has been to your credit.

So... I guess I really should stop worrying and start looking forward to next week! I'm sure that it'll be another great show by the "Wildcats"!

Happy modeling,

***Mike Roof***
