

Immune Thrombocytopenia: Evolving Treatment Paradigms and Patient-Centered Care

Learning Objectives:

- Discuss the pathogenesis of ITP and mechanisms of therapeutic strategies
- Differentiate the efficacy and safety profiles of current and emerging ITP therapies
- Develop evidence-based strategies to optimize treatment experiences and ensure patient-centered ITP care

Speaker Bio:

Allison Imahiyerobo, APN, is an Advanced Practice Nurse at the Hematology Oncology Physicians of Englewood in New Jersey. She specializes in the treatment of patients with hematologic malignancies, with particular expertise in immune thrombocytopenia (ITP). Ms. Imahiyerobo is a member of the American Academy of Nurse Practitioners and the Oncology Nursing Society, and she was the recipient of the 2018 Columbia University Irving Medical Center Liquid Nurse Practitioner of the Year Award. She has authored or coauthored numerous publications focusing on improving outcomes in patients with hematologic malignancies.
