TENS UNITS

BioStim® SD (Strength Duration) Digital TENS Unit

Compact, extremely durable and portable unit measures 3.9" L x 2.5" W x 1.1" H and weighs only 3.25 oz. The unit outputs an asymmetrical, biphasic square waveform and includes adjustable pulse width (10 μ s – 250 μ s) and frequency settings (1 Hz – 200 Hz). Features include four programmable functions: continuous, cycled burst, SD1 and SD2. Patient Compliance Meter shows how many hours the device was used. Features low battery indicator, timer and closure that covers all controls. When turned off, it stores the last setting used and displays it when turned on again. Clinician can lock the device in place to ensure the settings are retained. Includes a belt clip, lead wires, four 2" x 2" self-adhesive reusable electrodes, two "AA" alkaline batteries and carrying case. Five-year warranty. **Caution: Federal Law restricts this product to sale by or on the order of a physician or licensed practitioner.**

Impulse® TENS D5 5 Mode Digital TENS

Safe to wear, even at night. As a safety feature, the amplitude drops to "0" when the modes of operation are changed or when the lead wires or electrodes become detached from the patient. Sleek, digital, two-channel unit has a flip-top safety cover to prevent buttons from being accidentally pushed during wear. Lightweight unit features LCD screen and large push buttons. Inside cover reopens to an easy-to-read instruction diagram. Offers five preset and programmable modes of operation: continuous, width modulation, burst modulation, burst 1 and burst 2. Pulse intensity is continuously adjustable from 0 mA – 100 mA. Adjustable pulse rate ranges from 1 Hz – 120 Hz. Adjustable pulse width ranges from 25 μ s – 250 μ s. Features a mode lock, timer and patient compliance meter for clinician to monitor patient use. Unit comes with four electrodes, set of 48" lead wires, two "AA" Eveready batteries and carrying case. Three-year warranty. **Caution: Federal Law restricts this product to sale by or on the order of a physician or licensed practitioner.**

burst modulation, burst 1 and burst 2. Pulse intensity is continuously adjustable from 0 mA – 100 mA. Adjustable pulse rate ranges from 1 Hz – 120 Hz. Biomed® 2000XL/2000XT TENS Units

Dual-channel, analog TENS device provides nerve stimulation to treat pain. Three modes of operation: continuous; width modulation (50% decrease/increase of set width over five seconds); and burst (eight pulses per burst, two bursts per second). Pulse rate adjusts from 2 Hz – 150 Hz; pulse width adjusts from 50 μ s – 250 μ s; output intensity adjustable from 0 mA – 80 mA. Features covered amplitude knobs, hinged battery cover and horizontal belt clip for comfortable wear. Kit includes four pigtail electrodes, two pairs of lead wires, one 9-volt battery, carrying case and instructions. 3.9" L x 2.75" W x 1" H. Weighs 4.6 oz. Limited five-year warranty. **Caution: Federal Law restricts this product to sale by or on the order of a physician or licensed practitioner.**

NEUROMUSCULAR STIMULATORS (E-STIM)

BioStim® NMS² Digital Muscle Stimulator

Versatile, dual-channel unit functions as an NMS² or TENS with maximum control for optimal results. NMS² has seven preprogrammed therapies based upon clinical studies and three types of stimulation: continuous, cycled or reciprocation. Pulse rate is adjustable from 1 Hz – 120 Hz. Pulse width is adjustable from 0 µs – 400 µs. Features a patient lock system, compliance meter and timer. Unit comes with four electrodes, 48" lead wires, four "AA" Eveready batteries and carrying case. Five-year warranty. **Caution: Federal Law restricts this product to sale by or on the order of a physician or licensed practitioner.**

Impulse® EMS™ D7 Neuromuscular Unit

Sleek and portable, digital, dual-channel, four-lead muscle stimulator with flip-top safety cover. Features three modes of operation: constant, cycled and reciprocating. Offers seven preprogrammed therapies to ensure ease of use. The inside flip-top cover includes an instruction diagram. On time, off time, on ramp and off ramp are available. Timer allows use for a specified period of time. Low battery indicator light illuminates when the two "AA" batteries need to be changed. Safety

feature: if the device is not correctly attached to the user, the amplitude does not increase. The device has a lock that also can be utilized as a user compliance meter. Kit includes four 2" pigtail electrodes, one set of lead wires, two "AA" batteries, carrying case and instructions. Three-year warranty. **Caution: Federal Law restricts this product to sale by or on the order of a physician or licensed practitioner.**

INTERFERENTIAL STIMULATORS (IF)

BioStim® INF Interferential Stimulator

Utilizes a pulsed sine wave to stimulate tissue to reduce pain and decrease inflammation. Three pre-programmed sweeps for easy setup and patient instruction: 1 Hz – 10 Hz for edema reduction; 80 Hz – 150 Hz for pain relief; and 1 Hz – 150 Hz for total treatment. Offers bipolar stimulation using two electrodes where the interferential stimulation is already "mixed" or full interferential stimulation with the use of four electrodes. Includes timer. Uses four "AA" batteries or the BioStim® Wall Adaptor (included). **Caution: Federal Law restricts this product to sale by or on the order of a physician or licensed practitioner.**

COMBO/MULTI-MODALITY STIMULATORS

Quadstar® II TENS, NMS, INTERFERENTIAL COMBO

Fully loaded electrotherapy system, portable four-channel device delivers NMS, INF and TENS sequential stimulation. Great for sports medicine, physical therapy or anyone looking for the convenience and results of three units in one. Addresses the pain, muscle issues and edema that are common with most injuries. Allows the clinician to provide total treatment – just set and go. There are nine preprogrammed, fixed sequences taken from clinical studies, which enable the user to program 20 minutes of INF to loosen muscle groups, followed by 20 minutes of NMS therapy and ending with 20 minutes of TENS therapy for pain relief. Features three modes of operation: constant, burst and modulation. INF has adjustable frequency and four stimulation modes. NMS has three adjustable modes: constant, cycled and reciprocal. In addition, there is a patient lock system to hold prescription settings for ease of use. Patient compliance monitor records number of hours used. Unit comes with eight electrodes, color-coded 48" lead wires, carrying case and wall adapter. Five-year warranty. **Caution: Federal Law restricts this product to sale by or on the order of a physician or licensed practitioner.**

CONDUCTIVE GARMENTS AND SPRAY

BioKnit® Conductive Garments

CONTAINS SILVER LATEX FREE

The conductive fabric properties of the BioKnit® conductive garments and pads take the place of traditional adhesive electrodes when used in conjunction with an electrical stimulation device such as TENS or HVPS. Can be added to existing garments or bracing; attach with Velcro®. Woven with silver thread to provide even stimulation to the entire covered area. Cover hard-to-reach areas, such as the back and shoulder. Indicated for patients suffering from arthritis, neuropathy, carpal tunnel, tennis elbow, ACL injuries, low back pain and other conditions. Great alternative for patients with skin too sensitive for traditional electrodes. Reusable and hand washable. Single patient use only. **Caution: Federal Law restricts this product to sale by or on the order of a physician or licensed practitioner.**

Conductive Spray

Electrolyte spray uniformly and consistently increases electrode-to-skin conductivity, eliminates hot spots and prevents electrode dry-out during prolonged use. Replaces water and conventional media. Use in conjunction with electrode garments for increased conductivity and coating of silver conductive thread to prevent tarnish that water and other media may cause. Electrode garments should be moistened when used to increase the conductive properties.

CORE PRODUCTS (95)**Hollywog® WiTouch® Wireless TENS**

FDA cleared for over-the-counter sales. The world's first wireless, remote-controlled pain relief device incorporating TENS technology to specifically target low back pain. An advanced electronic design maximizes energy use, providing more than 100 30-minute treatment sessions per battery life. Incorporates the "gate control" and "opiate release" theories of pain management in a 30-minute preprogrammed treatment cycle. Frequency modulation minimizes stimulation accommodation. Thin, lightweight and flexible design makes the WiTouch® almost undetectable under clothing. Wireless remote controls intensity level and power with just three simple buttons.

ITEM #	HCPCS	SOLD BY
ELT11510	A9270	ea

Hollywog® WiTouch® Gel Pads

Adhere the WiTouch® device to the skin and provide a dispersive medium between the skin and the electronic stimulation of the built-in electrodes. Gel pads remove easily from a plastic backing and attach to the unit without any sticky residue or glues. Following treatments, pads can be covered with plastic backing for reuse in up to five additional applications, depending on skin type and preparation. Each pack comes with five pairs of Gel Pads.
