15 March 2024

FEBRUARY CONSUMER INFLATION RISES 3.2%; CORE INFLATION RUNS 3.8%

U.S. consumer prices are increasing at a 3.2% annualized pace in February - while core consumer inflation, which excludes commodity-driven food and energy prices, increased 3.8%.

Overall inflation has been impacted by a 2.2% increase in food costs, fueled by a 4.5% increase in prices for food eaten away from home and 1.0% increase in grocery prices. Also impacting consumer inflation is a -1.9% decrease in energy prices, which included a -3.9% decrease in gasoline prices.

Wholesale inflation increased at a 1.6% pace. This reflects producers', unlike in the past, have been able to pass on more of their higher costs to the consumer - something they have been unable to do for decades.

Still, it continues to adversely impact producers' earnings and future hiring and advances in manufacturing. This endangers future growth potential.

Those volatile items include gas prices, which jumped 3.8% just from January to February but are still below their level of a year ago. Air fares surged 3.6% after two months of much smaller increases. Clothing prices rose 0.6% after three months of declines but are unchanged compared with a year earlier.

New car prices ticked down 0.1% in February. Housing and rental costs, though, which tend to change more gradually, cooled in February: They rose 0.4% from January, slower than the 0.6% increase the previous month

STRATEGICALLY FOR CREDIT UNIONS

2.94%

0.01%

3yr CD

Despite February's elevated figures, most economists expect inflation to continue slowly declining this year. At the same time, the uptick last month may underscore the Fed's cautious approach toward interest rate cuts.

0.88%

1.77%

42%

Overall inflation has plummeted from a peak of 9.1% in June 2022, though it's now easing more slowly than it did last spring and summer. The prices of some goods, from appliances to furniture to used cars, are actually falling after clogged supply chains during the pandemic had sent prices soaring higher. There are more new cars on dealer lots and electronics on store shelves.

But while the pace of inflation has started to subside, consumer prices remain 56% higher than in 2005, 20% higher over the past 3 years alone.

Fed Chair Jerome Powell stated that policy-makers need "greater confidence" that inflation was steadily falling to their 2% target level before they start dropping their overnight benchmark rate.

Many cite the lack of perceived recessionary pressures as GDP has averaged close to 4% over the past two quarters.

But what they are not telling everyone is that the pace of growth in government spending has been exceeding that of consumer spending for six consecutive quarters. Without that injection, the actual pace of growth over the last 4 quarters nears 0% and nearly becomes negative.
