

AHIMSA PEACE SILK

Silk of life

YABNS & COLOBS

NEW TREND

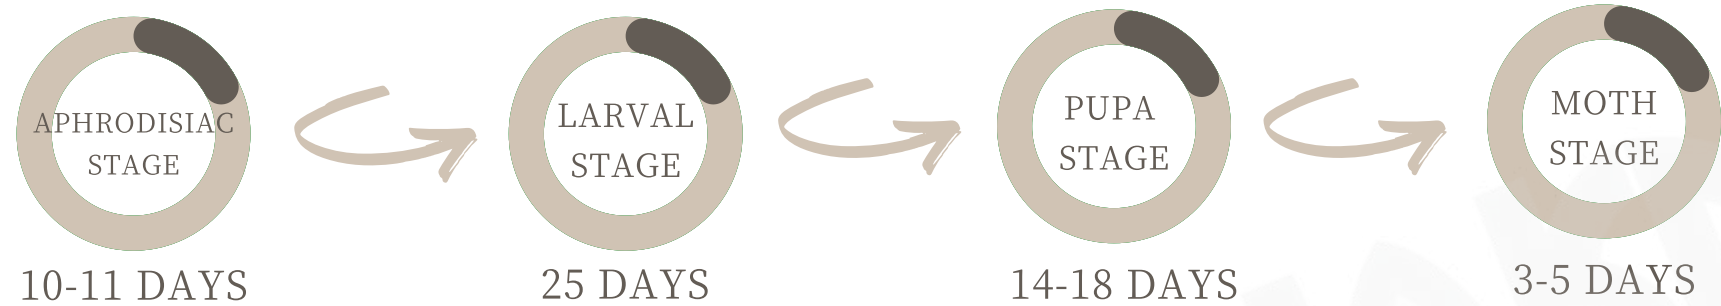

Consumers' cognition of sustainable fashion has made the voice of anti-fur non-killing more and more strong, rejecting inhumane methods of collecting raw materials, devoting more energy to maintaining animals and the ecological environment, and reviving traditional fabrics is becoming a sustainable fashion in the future.

THE BIRTH OF AHIMSA PEACE SILK

MULTI-PROCESS ✕ LIFE FIRST

- YARNS&COLORS uses a non-violent production process to extract silk in order to ensure the sustainability of the fibers, which allows the moths to be alive.
- Multi-process production of ahimsa peace silk is only for the gentle care of life, and the principle of life first.

The precious life of silkworms: the life cycle is generally only 56 days

REINVENTING NATURAL AESTHETICS

Life is kind

"Ahimsa Peace Silk" allows moths to survive, protect animal life, and produce silk fibers friendly .

Safe and secure

There are no chemical additives in the production process, and the survival of silkworm chrysalis is guaranteed, with a high degree of environmental protection awareness and advanced non-violent concept.

Comfortable

Produces silk without killing silkworms, respects life, and consumers can enjoy the soft and luxurious touch of silk.

Precious

Respecting the cultural and natural attributes of silk, combining precious craftsmanship and using high-quality products to bring unique and delicate feelings to consumers.
