

The Fastest Growing brand of Sleep Products in the Industry

Innersprings

- Revolutionary, narrow-diameter Quantum® coils form a perimeter around the mattress, providing comfortable support all the way to the edge of the bed.
- Articulates 24% better than foam encasing, great for use on an adjustable base.
- Fabric encased coils provide superior motion separation and conformability
- 968 coils in a queen size set

Mygel Memory Foam

Real Mattress In a Box
Compression Technology
results in the most efficient transportation
and a lower carbon footprint for this
mattress

Compression packed beds allow retailers to maintain higher inventory levels while taking up less space in their DC's. In addition, by compressing the beds, consumers are delivered a very consistent feel from what they lay on in the showrooms.

Sierra Sleep uses 30% castor seed oil in lieu of petroleum which provides a better carbon foot print than most memory foam products in the market place.

CertiPUR-US® Approved
Foams are made without:

- Chemicals associated with ozone depletion.
- PBDE flame retardants.
- Mercury, lead and other heavy metals.
- Formaldehyde.

Charcoal is infused into Sierra Sleep memory foam during production. This process is proven to reduce the amount of petroleum odor often associated with competitors products.

Green tea extract is added to the memory foam formula of all Sierra Sleep specialty beds. The green tea acts as a breath of fresh air and aids in the elimination of petroleum odors often associated with memory foam products.
