### Victor GF Yukon River Canine Formula with

Salmon and Sweet Potato is a super premium Grain Free Ocean Fish based formula that contains 32% Protein and 34% total carbohydrates. Ocean fish provide high levels of the highly desired Omega 3 Fatty acid. There is ample nutrition for All Life Stages including active Dogs, Puppies, and Lactating Females. This is an excellent choice for dogs that may be allergic to any grain, gluten, meat or poultry product.

## RECOMMENDED DAILY FEEDING GUIDE FOR ADULT DOGS

(Using standard 8 oz measuring cup)

Weight	Daily Amount
10	1
20	1½
30	2
40	2½
60	3¼
80	3¾
100	4½

Increase feed intake 1/2 cup for each 20 lbs over 100 lbs

Amounts are recommended for the maintenance of adult dogs. Make adjustments in daily feeding levels to maintain optimum body condition.

Schedule regular Veterinarian checkups for optimum health of your animal.

**FEEDING PUPPIES:** Puppies will typically start nibbling moistened dog foods at three to four weeks of age. Feed as much as the puppy will clean up in 20 minutes in 4 feedings at intervals throughout the day. You may mix with water, broth, or milk at a ration near 3 parts food and 1 part liquid. Do not leave moistened food out for more than thirty minutes to ensure product freshness. Puppies will be weaned from milk by 8 weeks of age. Continue to feed up to 4 times per day, and within a few months, the puppies can be transitioned to a self feeder until about 1 year of age. At this point, feed so as to maintain good body condition using the feeding chart as a guide.

**PREGNANCY AND NURSING:** Energy requirements are continually changing during stages of gestation and lactation and may require up to 4 times recommended levels of intake to maintain good body condition. Feed amount needed to maintain good body condition of your female dog.

**FEEDING TIPS - CHANGING DIET:** It is best to make a transition from one brand of dog food to another brand over a period of a week to 10 days. Gradually replace your current food with Victor Wild Salmon & Sweet Potato, increasing the percentage of the mix to 100% within 7 – 10 days.

### Scientifically Advanced Ingredients Supporting Long Term Digestive and Immune Health

Availa Pet is a combination of Organic Trace Mineral Complexes produced by USA based ZinPro Corporation. These minerals are easily absorbed by the digestive system into the bloodstream more efficiently than Non-Organic forms of the same minerals. These unique Organic minerals work on the cellular level promoting efficient metabolic function. Efficient cellular function supports a strong immune system. Availa Pet is a registered trademark of ZinPro

**SEL-PLEX®** A "Breakthrough in Canine Nutrition" Sel-Plex is a proprietary organic Selenium product developed by Alltech. Sel-Plex provides an organic selenium yeast that is presented in the same forms found in nature making it more available than inorganic forms, allowing animals to build nutrient reserves.

**Diamond V®** Labeled as Yeast Culture, this product has been fully fermented in a controlled environment and is rich in metabolites. These metabolites feed good digestive bacteria which in-turn supports a healthy digestion as well as a strong immune system.

## PROVIDE FRESH WATER AT ALL TIMES

**NUPRO®** is a functional protein from yeast, manufactured by a proprietary Alltech process. Nupro contains highly concentrated levels of essential and functional nutrients. This unique product works to support immune response and metabolism in animals. Young and growing animals will best utilize the support this product will provide.

**Actigen** A proprietary additive developed by Alltech. Actigen represents a second generation additive derived from the cell wall of a select strain of yeast. Actigen acts as a prebiotic that works with other nutrients to support animals' immune defense systems.

\*Actigen, Nupro, Sel-Plex and Lacto-Sacc are registered trademarks of Alltech.
