# Speechless Friends

- Llamas and Alpacas were domesticated by the native South Americans 6300 years ago. The gentle, curious and charming personality of these animals inspired the natives to call them **SPEECHLESS FRIENDS**, a name we have adopted for the products we produce from our llama & alpaca wool.
- The llama & alpaca wool in most of our products originates with llamas & alpacas that were born, raised and sheared by us on our farm. The llamas & alpacas think this is pretty special. So do we - and we hope you will too!

# Why Llama & Alpaca Wool

- **Llamas and alpacas produce one of the world's finest and most luxurious natural wools. This wool has a number of extremely desirable attributes.**
- **Llama and alpaca wool is silky, soft, supple and smooth to the touch. It is prized for unique silky feel and luxurious handle.**
- **The absence of lanolin and other oils in the wool and its extraordinary fineness of handle results in products that are both hypoallergenic and luxuriously soft on your skin.**
- **Llama and alpaca wool is unusually strong and resilient. The strength does not diminish as it becomes finer.**
- **Llama and alpaca wool grows on the llamas & alpacas in 22 genetically distinct natural colors. Many of those distinct colors are naturally grown in many slight color variations. The result is a host of natural colors.**
- **Llama and alpaca wool is easily dyed any color and always retains its natural luster.**
- **Llama and alpaca wool contains microscopic air pockets which creates lightweight clothing with high insulating values.**
- **Llama and alpaca wool is as soft as cashmere and warmer and stronger than lamb's wool.**
- **Most people can comfortably wear garments made from high quality llama and alpaca wool next to their skin.**
- **Llama & alpaca wool wicks moisture away from your body, thus reducing dampness and odor.**

# Quality and Price

- The supply of llama & alpaca wool is relatively limited, and the quality of the wool is very high.
- As such, the price of products made from llama & alpaca wool are above average.  
~ and worth every penny! ~

# Guarantee

**SATISFACTION GUARANTEED WITHOUT  
ANY QUESTIONS.**

We will give you a full refund, except shipping, if you return items to us within 7 days of your receipt of them, unused, and with sales tags attached.

# Socks – general information

Socks are machine knitted with 80% llama & alpaca yarn, 18% nylon, and 2% spandex.

- Llama & alpaca yarn is for warmth and comfort.
- Nylon is for stretch and fit.
- Spandex is for control and support.

Socks are exceptionally breathable, reducing dampness. Llama & alpaca wool is hypoallergenic and wicks moisture away from your skin. The Socks do not absorb water, do not foster bacterial growth, and thereby reduce odor.

People with circulatory problems will find the Socks especially comfortable because each wool fibre is hollow, allowing it to trap warm air and surround the foot in softness and warmth.

Socks are machine washable in warm water. Air dry.

"I was cold - except for my feet" (Gaila Eddie, canoeing)

"In over 50 years of hiking and skiing, I have never used a warmer, more comfortable or drier sock" (Derek McManus, Owner, Speechless Friends - biased for sure - and true).

# Duvets – General Information

Llama & Alpaca wool is ideal for duvets because it is lightweight, absorbs moisture, and breathes naturally to keep you warm, dry and comfortable.

Duvets are made with one ounce of llama & alpaca wool batting per square foot. Llama & Alpaca wool fibres are hollow, making them one of the warmest natural fibres available. It is also very light and soft so we add some sheep wool to hold the llama & alpaca wool fibers apart and produce more loft. This incorporates more air into your duvet which will then act as an insulator.

Hypoallergenic - Alpaca fiber's porous nature is naturally dry and clean which prevents dust mites and other allergens from settling in. Research has found that dust mites are one of the most common causes of asthma and allergies in the bedroom.

Environmentally Friendly - No chemicals, dyes or bleaches are used when the wool is processed. We use only 100% cotton fabric so the whole product is 100% biodegradable at the end of its long life. Alpaca & Llama wool loves fresh air and will re-loft when put outside for a few hours.

Sleep Well and Easy - People who sleep with wool get a longer, more restful sleep – up to 15% longer and deeper. Your morning bed-making is less stressful as well. We recommend the use of a duvet cover so you just give the duvet one good shake over the bed and you are ready to start your day!

Duvets are made with outer coverings of 100% cotton, 230 thread count (TC). Each duvet is packaged in a reusable cotton drawstring bag.

Duvets are washable – with care.
