

Anti-spam Policy

What is spam?

In the context of electronic messaging, spam refers to unsolicited, bulk or indiscriminate messages, typically sent for a commercial purpose.

Rao Design Group, Inc. has a zero-tolerance spam policy.

This anti-spam policy

This [anti-spam policy](#) is based on a [Freenetlaw](#) template supplied by [Website Contracts](#).

Automated spam filtering

Rao Design Group, Inc.'s messaging systems automatically scan all incoming email and other messages, and filter-out messages that appear to be spam.

Problems with spam filtering

No message filtering system is 100% accurate, and from time to time legitimate messages will be filtered-out by Rao Design Group, Inc.'s systems.

If you believe this has happened to a message you have sent, please advise the message recipient by another means.

You can reduce the risk of a message being caught by the spam filters by sending the message in plain text (i.e., no HTML), removing any attachments, and ensuring that your messages are scanned for malware before dispatch.

Changes to this anti-spam policy

Rao Design Group, Inc. may amend this anti-spam policy at any time by publishing a new version on this website.
