WATER QUALITY SUBCOMMITTEE

Ann Beaver, chair

This report changes very little from year to year, which is a good thing. The results of our water sampling since the last annual meeting continue to show the water quality of the lakes falls within the normal range for lakes in our ecoregion. Monthly results vary some from year to year, due to weather conditions, but the overall condition of our lakes remains fairly consistent. A more detailed report will be included in the winter, 2018 newsletter. We continue to update the CLA Lake Water Quality Plan for each lake at the end of the testing season so they may be included in our applications for DNR grants for the treatment of curly-leaf pondweed.
