Estimator/Project Manager:

S.M. Hentges & Sons is a Heavy Civil construction company based in Jordan, Minnesota in need of an industry leading Estimator/Project Manager with a diverse expertise related to earthwork, structures, and utility (sewer, water, stormwater) installations.

The successful candidate will continue and expand upon our solid reputation in the upper Midwest of taking on the largest and most challenging projects. We are looking for a team player that is willing to work hard, safely, and smart in a fast-paced environment that encourages and rewards creativity and entrepreneurial thinking.

The ideal candidate is a responsive, highly productive professional who can effectively bid and manage a wide range of varying projects. This person will report directly to our Iowa Area Manager and will be based in our Urbandale, Iowa Regional Office. This individual will also interact with the estimating team and resources in our home office in Jordan, Minnesota.

Responsibilities:

- Estimating and bidding projects using electronic takeoff methods and HCSS Heavy Bid software
- Managing jobs using Heavy Job and other management systems.
- Scheduling construction projects using MS Project, Primavera, or similar CPM software.
- Building and maintaining key relationships in our industry with customers, suppliers, and sub-contractors.
- Work with our field leadership – Superintendents and Foremen – to ensure effective management of projects from start to finish.
- Salaried position requiring 50+ hours per week on average
- Some travel required for job site meetings, site investigations, and bidding. (1-3 days per month ave.)

Experience

- 7+ years as an Estimator and/or PM for challenging projects -preferred
- Experience with other areas of Heavy Highway Civil work is a plus – bridges, foundations, etc.
- Field experience building heavy civil projects is a plus
- Bachelor's Degree in Construction Management or Engineering - preferred
- Industry certifications and memberships
- Excellent computer, communication, leadership, and management skills
- Ability to fill multiple roles simultaneously
- Proven track record of profitability on projects through bidding and construction phases

We are an equal opportunity employer.
