## *PAUROTIS PALM*

Scientific Name: *Acoelorrhaphe wrightii*

Growth Pattern: Multiple, slender clustered trunks touching at base. Fiber leaf sheaths on trunks. Native to coastal areas of South Florida.

Description: Fronds armed, deeply cut, with thin petiole bases that are undivided and have orange, saw-like teeth. Leaves medium to light green above, almost silvery below, to about 3' wide.

Soil and Moisture: Tolerant of most soils. Best in moist soils. Will grow in brackish water or upland soils.

pH Preference: 5.5 – 7.5

Salt Tolerance: Fair

Freezes at about 20 degrees F

Rate of Growth: Moderate

Landscaping Uses: Specimen, framing, border, avenue and used with large rocks.
